Make Conflict Your Partner for Positive Change! Clinical psychologist and transformative communication expert Dr. Nate Regier believes that the biggest energy crisis facing our world is the misuse of conflict. Most organizations are terrified of conflict, seeing it as a sign of trouble. But conflict isn't the problem, says Regier. It's all about how we use the energy. When people misuse conflict energy, it becomes drama: they struggle against themselves or each other to feel justified about their negative behavior. The cost to companies, teams, and relationships is staggering. The alternative, says Regier, is compassionate accountability: struggling with others through conflict. Discover the Compassion Cycle, an elegant model for balancing empathy, care, and transparency with boundaries, goals, and standards. Provocative, illuminating, and highly practical, this book helps us avoid the casualties of conflict through openness, resourcefulness, and persistence.

The Heat Exchanger Design Handbook (HEDH) was first launched in 1983. Since then, it has been continuously updated and now, after two decades and in more than double its original size, remains the standard reference source for design and other information on heat transfer, heat exchangers, and associated technologies. Currently, HEDH contains more than 6,000 pages of technical information compiled and edited by the world's foremost specialists and is presented in five parts dealing respectively with: Heat exchanger theory; Fluid mechanics and heat transfer; Thermal and hydraulic design of heat exchangers; Mechanical design of heat exchangers; Physical properties.

The book Working on the Wild Side is collection of sixty short stories about the author's twenty-five-year career as a wildlife officer. The stories tend to focus on the humorous things he encountered over the years. Instead of the blood and guts stories, it is more about the funny things people said or did.
