In the video, you can see a man with a small girl clinging to his back on a rope ladder on top of the United States/Mexico International Boundary Fence.

To some, the idea of a border wall with Mexico represents a necessary and practical barrier to illegal immigration and the perceived host of ills that are associated with it. To others, it is both an unrealistic and inhumane effort that demonizes desperate individuals and families who are only seeking a better life. The debate is fierce and is bound up with competing notions of crime, ethnicity, opportunity, fairness, justice, and what America promises, offers, stands for, and represents. All sides of the debate are presented here, and each is given a fair and respectful hearing, allowing readers to sift through fact and opinion, evaluate the strength of arguments, and form an educated opinion on the issue.

As increasing global economic disparities, violence, and climate change provoke a rising tide of forced migration, many countries and local communities are responding by building walls—literal and metaphorical—between citizens and newcomers. *Up Against the Wall: Re-imagining the U.S.-Mexico Border* examines the temptation to construct such walls through a penetrating analysis of the U.S. wall at the U.S.-Mexico border, as well as investigating the walling out of Mexicans in local communities. Calling into question the building of a wall against a friendly neighboring nation, *Up Against the Wall* offers an analysis of the differences between borders and boundaries. This analysis opens the way to envisioning alternatives to the stark and policed divisions that are imposed by walls of all kinds. Tracing the consequences of imperialism and colonization as citizens grapple with new migrant neighbors, the book paints compelling examples from key locales affected by the wall—Nogales, Arizona vs. Nogales, Sonora; Tijuana/San Diego; and the lower Rio Grande Valley of Texas. An extended case study of Santa Barbara describes the creation of an internal colony in the aftermath of the U.S. conquest of Mexican land, a history that is relevant to many U.S. cities and towns. Ranging from human rights issues in the wake of massive global migration to the role of national restorative shame in the United States for the treatment of Mexicans since 1848, the authors delve into the broad repercussions of the unjust and often tragic consequences of excluding others through walled structures along with the withholding of citizenship and full societal inclusion. Through the lens of a detailed examination of forced migration from Mexico to the United States, this transdisciplinary text, drawing on philosophy, psychology, and political theory, opens up multiple insights into how nations and communities can coexist with more justice and more compassion.

"We're going to build a wall." Borders have been drawn since the beginning of time, but in recent years artificial barriers have become increasingly significant to the political conversation across the world. Donald Trump was elected President of the United States while promising to build a wall on the Mexico border, and in Europe, the international movements of migrants and refugees have sparked fierce discussion about whether and how countries should restrict access to their territory by erecting physical barriers. Virtual walls are also built and crushed at increasing speed. In the post-9/11 era there is a greater danger from so-called "transnational non-state actors", and computer hacking and cyberterrorism threaten to overwhelm our technological barriers. In this timely and original book, Said Saddiki scrutinises the physical and virtual walls located in four continents, including Israel, India, the southern EU border, Morocco, and the proposed border wall between Mexico and the US. Saddiki's detailed analysis explores the tensions between the rise of globalisation, which some have argued will lead to a "borderless world" and "the end of the nation-state", and the rapid development in recent decades of border control systems. Saddiki examines both regular and irregular cross-border activities, including the flow of people, goods, ideas, drugs, weapons, capital, and information, and explores the disparities that are reflected by barriers to such activities. He considers the consequences of the construction of physical and virtual walls, including their impact on international relations and the rise of the multi-billion dollar security market. *World of Walls: The Structure, Roles and Effectiveness of Separation Barriers* is important reading for all those interested in the topics of immigration, border security, international relations, and policy.

An esteemed journalist delivers a compelling on-the-ground account of the construction of President Trump's border wall in San Diego—and the impact on the lives of local residents. In August of 2019, Donald Trump finished building his border wall—at least a portion of it. In San Diego, the Army Corps of engineers completed two years of construction on a 14-mile steel beamed barrier that extends eighteen-feet high and cost a staggering \$147 million. As one border patrol agent told reporters visiting the site, "It was funded and approved and it was built under his administration. It is Trump's wall." *14 Miles* is a definitive account of all the dramatic construction, showing readers what it feels like to stand on both sides of the border looking up at the imposing and controversial barrier. After the Department of Homeland Security announced an open call for wall prototypes in 2017, DW Gibson, an award-winning journalist and Southern California native, began visiting the construction site and watching as the prototype samples were erected. Gibson spent those two years closely observing the work and interviewing local residents to understand how it was impacting them. These include April McKee, a border patrol agent leading a recruiting program that trains teenagers to work as agents; Jeff Schwilk, a retired Marine who organizes pro-wall rallies as head of the group San Diegans for Secure Borders; Roque De La Fuente, an eccentric millionaire developer who uses the construction as a promotional opportunity; and Civile Ephedouard, a Haitian refugee who spent two years migrating through Central America to the United States and anxiously awaits the results of his asylum case. Fascinating, propulsive, and incredibly timely, *14 Miles* is an important work that explains not only how the wall has reshaped our landscape and countless lives but also how its shadow looms over our very identity as a nation.

The construction of a wall on the U.S.-Mexico border--whether to build it or not--has become a hot-button issue in contemporary America. A recent impasse over funding a wall caused the longest government shutdown in U.S. history, sharpening partisan divisions across the nation. In the Arizona borderlands, groups of predominantly white American citizens have been mobilizing for decades--some help undocumented immigrants bypass governmental detection, while others help law enforcement agents to apprehend immigrants. Activists on both the left and the right mobilize without an immediate personal connection to the issue at hand, many doubting that their actions can bring about the long-term change they desire. Why, then, do they engage in immigration and border politics so passionately? *Divided by the Wall* offers a one-of-a-kind comparative study of progressive pro-immigrant activists and

their conservative immigration-restrictionist opponents. Using twenty months of ethnographic research with five grassroots organizations, Emine Fidan Elcioglu shows how immigration politics has become a substitute for struggles around class inequality among white Americans. She demonstrates how activists mobilized not only to change the rules of immigration but also to experience a change in themselves. Elcioglu finds that the variation in social class and intersectional identity across the two sides mapped onto disparate concerns about state power. As activists strategized ways to transform the scope of the state's power, they also tried to carve out self-transformative roles for themselves. Provocative and even-handed, *Divided by the Wall* challenges our understanding of immigration politics in times of growing inequality and insecurity.

In her Brookings Essay, *The Wall*, Brookings Senior Fellow Vanda Felbab-Brown explains the true costs of building a barrier along the U.S.-Mexico border, including (but not limited to) the estimated \$12 to \$21.6 billion price tag of construction. Felbab-Brown explains the importance of the United States' relationship with Mexico, on which the U.S. relies for cooperation on security, environmental, agricultural, water-sharing, trade, and drug smuggling issues. The author uses her extensive on-the-ground experience in Mexico to illustrate the environmental and community disruption that the construction of a wall would cause, while arguing that the barrier would do nothing to stop illicit flows into the United States. She recalls personal interviews she has had with people living in border areas, including a woman whose family relies on remittances from the U.S., a teenager trying to get out of a local gang, and others.

99 Reasons Why a USA/Mexico Border Wall is Needed is a comprehensive report put together with the help of experts in the field. 99 Reasons Why a USA/Mexico Border Wall is Needed takes a deep dive into the divisive wall and shows compelling evidence to support its creation. Studies, statistical analysis, surveys, interviews and personal stories fill the pages with reasons to support the vitally necessary border wall. Never has a wall been so desperately needed as the wall that is to be created on the USA/Mexico border. Pegged to be the greatest, most beautiful and most effective wall ever built, the USA/Mexico border wall is a must for the preservation and prosperity of the American people.

Multi-Grammy-winning producer and New York Times bestselling author Kabir Sehgal examines the relationship between the US and Mexico, accompanied by music from Grammy-winning musician Arturo O'Farrill and special guests, an extended foreword from historian Douglas Brinkley, and afterword by Ambassador Andrew Young. The US-Mexican relationship has involved periods of great friendship with robust trade and loose immigration policies. But its history has also been beset by wars, drug trade, and human trafficking. With the latest xenophobic turn toward Mexico, this book contextualizes the latest swing in the up-and-down, two-hundred-year history of these two countries. In a lyrical narrative reflecting on Fandango Fronterizo, an annual musical celebration held on both sides of the border wall, Sehgal addresses how the broken US-Mexico relationship has been repaired in the past and continues to adapt today. *FANDANGO AT THE WALL* provides clarity to the current debate regarding construction of the wall and America's posture toward immigration. Sehgal and his artistic collaborators brought over thirty musicians from various traditions to the San Diego-Tijuana border to record a musical repertoire composed of son jarocho songs from Veracruz, Mexico and Latin jazz. With these tunes accompanying a call-to-action narrative, *FANDANGO AT THE WALL* demonstrates how music can heal and provide a soundtrack for the US, Mexico, and beyond.
