While simulation has a vast area of application, this textbook focuses on the use of simulation to analyse business processes. It provides an up-to-date coverage of all stages of the discrete-event simulation (DES) process, covering important areas such as conceptual modelling, modelling input data, verification and validation and simulation output analysis. The book is comprehensive yet uncomplicated, covering the theoretical aspects of the subject and the practical elements of a typical simulation project, demonstrated by cases, examples and exercises. It also shows how simulation relates to new developments in machine learning, big data analytics and conceptual modelling techniques. Guidance is provided on how to build DES models using the Arena, Simio and Simul8 simulation software, and tutorials for using the software are incorporated throughout. Simulation Modelling offers a uniquely practical and end-to-end overview of the subject, which makes it perfect required or recommended reading for advanced undergraduate and postgraduate students studying business simulation and simulation modelling as part of operations research, business analytics, supply chain management and computer science courses.

The mysteries of the versatile LS series engines are unlocked in the Haynes Techbook Cummins Diesel Engine Manual. Covering everything from engine overhaul, cylinder head selection and modification, induction and fuel systems, camshafts and valve train, to beefing-up the bottom end, turbo and supercharger add-ons, engine swaps and extreme builds, this manual will help you get the most from your LS-powered vehicle.

This interdisciplinary reference and guide provides an introduction to modeling methodologies and models which form the starting point for deriving efficient and effective solution techniques, and presents a series of case studies that demonstrate how heuristic and analytical approaches may be used to solve large and complex problems. Topics and features: introduces the key modeling methods and tools, including heuristic and mathematical programming-based models, and queueing theory and simulation techniques; demonstrates the use of heuristic methods to not only solve complex decision-making problems, but also to derive a simpler solution technique; presents case studies on a broad range of applications that make use of techniques from genetic algorithms and fuzzy logic, tabu search, and queueing theory; reviews examples incorporating system dynamics modeling, cellular automata and agent-based simulations, and the use of big data; supplies expanded descriptions and examples in the appendices.

Learn to code quickly, accurately, and efficiently with 2018 HCPCS Level II, Standard Edition. From coding expert Carol J. Buck, this easy-to-use reference presents the latest HCPCS codes to help you comply with coding regulations, confidently locate specific codes, manage reimbursement for supplies, report patient data, code Medicare cases, and more. At-a-glance code listings and distinctive symbols make it easy to quickly identify new, revised, reinstated, and deleted codes. Easy-to-use format optimizes reimbursement and assists with quick, accurate, and efficient coding. Jurisdiction symbols show the appropriate contractor to be billed for suppliers submitting claims to Medicare contractors, Part B carriers, Medicare Administrative Contractors submitting for DMEPOS services provided, and more. Special coverage alerts helps you identify when codes have special coverage instructions, are not covered or valid by Medicare, or may be paid at the carrier's discretion. Drug code annotations identify brand name drugs as well as drugs that appear on the National Drug Class (NDC) directory and other Food and Drug Administration (FDA) approved drugs. Codingupdates.com website includes quarterly updates to HCPCS codes, content updates, and the opportunity to sign up for e-mail notifications of the newest updates. NEW! Updated 2018 code set features the latest Healthcare Common Procedure Coding System codes to comply with current HCPCS standards for fast and accurate coding.
