Culture of Muslim Spain. Arab civilization in the peninsula reached its zenith when the political power of the Arabs began to decline. Immediately following the Muslim conquest in the 8th century, there were no traces of a cultural level higher than that attained by the Mozarabs who lived among the Arab conquerors. All available evidence points to the fact that in this period popular works of medicine, agriculture, astrology, and geography were translated from Latin into Arabic.

The dynasty of the Andalusian Umayyads (756 – 1031) marked the growth and perfection of the Arabic civilization in Spain. Its history may be divided into two major periods—that of the independent emirate (756 – 929) and that of the caliphate (929 – 1031)—and may be interpreted as revolving around three persons of like name— Abd al-Ra m n I (756 – 788), Abd al-Ra m n II (822 – 852), Abd al-Ra m n III (912 – 961)—and the all-powerful jib (chief minister) Ab mir ...

When Muslims invaded Spain and conquered the Iberian Peninsula, they brought with them a culture of education and tolerance as well as architectural and culinary influences. For years the political history of Al Andalus had lacked a competent historian. My appetite was created by Bernard Reilly in his hugely exciting book on the confrontation of the Christians with Islam from c950 to 1100 in the age of El Cid. This interest was itself nurtured by driving holidays in Spain which took in Cordoba and Granada.

Islam in Spain: The Past Spain, pre-Islam, was ruled by the Visigoths, a German gothic tribe who invaded France, Italy, and Spain. The Visigoth ' s reign at the time of the Islamic invasion, was weak, making it fast and easy for the Moors to conquer the Iberian peninsula and the south of France.

The period of Muslim occupation in Spain represents the only significant contact Islam and Europe was ever to have on European soil. In this important as well as fascinating study, Watt traces Islam's influence upon Spain and European civilization--from the collapse of the Visigoths in the eighth century to the fall of Granada in the fifteenth, and considers Spain's importance as a part of the Islamic empire. Particular attention is given to the golden period of economic and political stability achieved under the Umayyads. Without losing themselves in detail and without sacrificing complexity, the authors discuss the political, social, and economic continuity in Islamic Spain, or al-Andalus, in light of its cultural and intellectual effects upon the rest of Europe. Medieval Christianity, Watt points out, found models of scholarship in the Islamic philosophers and adapted the idea of holy war to its own purposes while the final reunification of Spain under the aegis of the Reconquista played a significant role in bringing Europe out of the Middle Ages. A survey essential to anyone seeking a more complete knowledge of European or Islamic history, the volume also includes sections on literature and philology by Pierre Cachia. This series of "Islamic surveys" is designed to give the educated reader something more than can be found in the usual popular books. Each work undertakes to survey a special part of the field, and to show the present stage of scholarship here. Where there is a clear picture this will be given; but where there are gaps, obscurities and differences of opinion, these will also be indicated. Full and annotated bibliographies will afford guidance to those who want to pursue their studies further. There will also be some account of the nature and extent of the source material. The series is addressed in the first place to the educated reader, with little or no previous knowledge of the subject; its character is such that it should be of value also to university students and others whose interest is of a more professional kind.

This is the first study in English of the political history of Muslim Spain and Portugal, based on Arab sources. It provides comprehensive coverage of events across the whole of the region from 711 to the fall of Granada in 1492. Up till now the history of this region has been badly neglected in comparison with studies of other states in medieval Europe. When considered at all, it has been largely written from Christian sources and seen in terms of the Christian Reconquest. Hugh Kennedy raises the profile of this important area, bringing the subject alive with vivid translations from Arab sources. This will be fascinating reading for historians of medieval Europe and for historians of the middle east drawing out the similarities and contrasts with other areas of the Muslim world.

The civilisation of medieval Muslim Spain is perhaps the most brilliant and prosperous of its age and has been essential to the direction which civilisation in medieval Europe took. This volume is the first ever in any language to deal in a really comprehensive manner with all major aspects of Islamic civilisation in medieval Spain.

Muslim Spain was first published in 1974. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. This comprehensive history of Muslim Spain in the centuries from 711 to 1492 provides a panoramic view of the whole field of Hispano-Arabic culture, including science, philosophy, and the arts. As the account makes clear, Muslim Spain was always an integral part of the main literary and intellectual stream of the East and as such was as Islamic as Syria or Egypt. Thus the history is important for an understanding of Islamic culture as a whole and of the interaction of people and ideas. The author shows that the interdependence and continuity of Muslim culture through its long history was nurtured by the unhampered travel of students and scholars and the circulation of publications throughout the width and breadth of the Islamic Empire, notwithstanding the political division that separated Muslim Spain from the center of Islam. The first five chapters of the book describe, dynasty by dynasty, the Muslims' conquest and rule. The remaining chapters discuss in detail all aspects of Hispano-Arabic culture. Among the subjects are the social structure, the sciences and education, Arabic and linguistic studies, prose and belles lettres, poetry, history, geography, and travel, courtly love, religion, philosophy and mysticism, the natural sciences, and architecture, the minor arts, and music. The book is illustrated with photographs, drawings, and maps, and there is an extensive bibliography.

A magisterial, myth-dispelling history of Islamic Spain spanning the millennium between the founding of Islam in the seventh century and the final expulsion of Spain's Muslims in the seventeenth. In *Kingdoms of Faith*, award-winning historian Brian A. Catlos rewrites the history of Islamic Spain from the ground up, evoking the cultural splendor of al-Andalus, while offering an authoritative new interpretation of the forces that shaped it. Prior accounts have portrayed Islamic Spain as a paradise of enlightened tolerance or the site where civilizations clashed. Catlos taps a wide array of primary sources to paint a more complex portrait, showing how Muslims, Christians, and Jews together built a sophisticated civilization that transformed the Western world, even as they waged relentless war against each other and their coreligionists. Religion was often the language of conflict, but seldom its cause -- a lesson we would do well to learn in our own time.

What made Muslim Spain a unique and successful society? Richard Hitchcock explores the background to its powerful legacy in the formation of modern Spain, using a chronological framework while constantly keeping in view the shifting social patterns caused by the changing balance between town and country, major and minor dynasties, foreign groupings and repeated invasions from North Africa. You'll learn about the main historical developments in depth, such as the self-defeating independence of the Taifas, the so-called 'Party Kings', and the prolonged colonisation of the Muslim subject population under the increasingly severe dominance of the Kingdoms of Aragon and Castile. You'll also find wide-ranging discussion of important topics such as inter-faith relations, multi-ethnic competing groups and how intellectual life was enriched by pluralism and influences from abroad.
