Web Services Architecture In
ASP.NET, a web service is
essentially a listener that
monitors a particular URL
exposed via HTTP, looking
for requests packaged as
SOAP messages. When a
request arrives, the ASP.NET

ASP.NET in a Nutshell [Book]

A Web Service is a web application that follows code-behind architecture such as the ASP.NET web pages but it does not have a user interface. A Web Service application is

Implementation
basically a class containing
a method that is exposed
over the Web using simple
messaging protocol stacks.
The methods of a Web Service
are called web methods.
