The novel coronavirus disease 2019 (COVID-19) pandemic has had a particularly large influence on the specialty of otolaryngology–head and neck surgery. Molecular studies implicate nasal epithelial cells, specifically goblet and ciliated cells, as the entry site for severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) and a reservoir for dissemination within a given patient and from person to person.

for diagnostic and therapeutic procedures. The book includes sections titled Head and Neck, Larynx and Trachea, Nose and Paranasal Sinuses, Oral Cavity and Oropharynx, and Otology and Neurotology. It also covers such topics as patient evaluation and treatment, basic surgical procedures, as well as more conservative approaches. The book is authored by renowned experts throughout Europe, and features a layout that facilitates quick and easy retrieval of information.

"Otolaryngology-Head and Neck Surgery has developed as a specialty in recognition of the highly focused attention necessary to fully comprehend and master the intricate anatomic and physiologic relationships of the structures

Get Free Otolaryngology Head And Neck Surgery Clinical Reference Guide

located between the thoracic inlet and the foramen magnum. Our specialty originally developed out of a need to manage the intricacies of this area of the body, but as the depth of our knowledge grew subspecialties within the discipline branched off, and often it may seem that we are a collection of otologists, neurotologists, head and neck oncologists, laryngologists, pediatric otolaryngologists, rhinologists, facial plastic surgeons, and general otolaryngologists. This text should serve as a concise yet practical review and reference textbook for anyone interested in the full scope of otolaryngology-head and neck surgery"--Provided by publisher.
