For fans of Wesley the Owl and The Soul of an Octopus, the story of a sick baby bird nursed back to health and into the wild by renowned writer/artist Julie Zickefoose. When Jemima, a young orphaned blue jay, is brought to wildlife rehabilitator Julie Zickefoose, she is a virtually tailless, palm-sized bundle of gray-blue fluff. But she is starved and very sick. Julie's constant care brings her around, and as Jemima is raised for eventual release, she takes over the house and the rest of the author's summer. Shortly after release, Jemima turns up with a deadly disease. But medicating a free-flying wild bird is a challenge. When the PBS show Nature expresses interest in filming Jemima, Julie must train her to behave on camera, as the bird gets ever wilder. Jemima bonds with a wild jay, stretching her ties with the family. Throughout, Julie grapples with the fallout of Jemima's illness, studies molt and migration, and does her best to keep Jemima strong and wild. She falls hard for this engaging, feisty and funny bird, a creative muse and source of strength through the author's own heartbreaking changes. Emotional and honest, Saving Jemima is a universal story of the communion between a wild creature and the human chosen to raise it.

During one month in the autumn of election year 2000, scores of movie-business strivers are focused on one goal: getting a piece of an elusive, but surely huge, television saga, the one that opens with Huns sweeping through Mongolia and closes with a Mormon diviner in the Las Vegas desert; the sure-to-please-everyone multigenerational TV miniseries about diviners, those miracle workers who bring water to perpetually thirsty (and hungry and love-starved) humankind. Among the wannabes: Vanessa Meandro, hot-tempered head of Means of Production, an indie film company; her harried and varied staff; a Sikh cab driver, promoted to the office of -theory and practice of TV; a bipolar bicycle messenger, who makes a fateful mis-delivery; two celebrity publicists, the Vanderbilt girls; a thriller writer who gives Botox parties; the daughter of an L.A. big-shot, who is hired to fetch Vanessa's Krispy Kremes and more; a word man who coined the phrase -- inspired by a true story; and a supreme court justice who wants to write the script. A few true artists surface in the course of Moody's rollicking but intricately woven novel, and real emotion eventually blossoms for most of Vanessa's staff at Means of Production, even herself. The Diviners is a cautionary tale about pointless ambition; a richly detailed look at the interlocking worlds of money, politics, addiction, sex, work, and family in modern America; and a masterpiece of comedy that will bring Rick Moody to a still higher level of appreciation.

Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.
