Graham Burgess is the author of thirty books, a former champion of the Danish region of Funen, and holds the world record for marathon blitz chess playing. John Nunn is a three-time winner of both the World Solving Championship and the British Chess Federation Book of the Year Award. John Emms is an experienced chess coach and writer, who finished equal first in the 1997 British Championship and was chess columnist of the Young Telegraph. Join the authors in studying these games, the cream of two centuries of international chess, and develop your own chess-playing skills - whatever your current standard. Instructive points at the end of each game highlight the lessons to be learned. First published in 1998, a second edition of The Mammoth Book of the World's Greatest Chess Games in 2004 included an additional twelve games. Another new edition in 2010 included a further thirteen games as well as some significant revisions to the analysis and information regarding other games in earlier editions of the book, facilitated by the use of a variety of chess software. This 2021 edition, further updated and expanded, now includes 145 games. The authors have made full use of the new generation of chess analysis engines that apply neural-network based AI.

How does one determine the "best" chess games? What one may see as brilliant, another may see as simply necessary. Like some art lovers, chess fans claim that they know a good game when they see it, and that they know better from good. But "best"? How is this articulated? This book, itself a work of art, is brought together by the use of five criteria: the overall aesthetics (clever and relentless are insufficient qualities); the originality (e.g., not yet another white knight sacrifice in a Sicilian); the level of opposition (the loser played very well); the soundness (i.e., are the moves refutable with perfect play?), accuracy (few of the moves are second-best), and difficulty (the winner overcame major obstacles) of the game; and finally the overall breadth and depth (one wants a series of sparkling ideas, with no dry patches). The 100 best games were taken from an initial field of about 7,000 played from 1900 through 1999 that had already gained some attention in magazines, books and periodicals. Three hundred games were then selected that appeared to have features consistent with the criteria. The 300 games were evaluated with scores-points given for each category of criteria. The games were then ranked, one to 100, by the score they received. No attempt was made to balance the selection according to period, nationality of players or opening. Also included is a chapter on the most overrated games of the twentieth century and one on games that would have made the list if... Garry Kasparov has dominated the chess world for more than twenty years. His dynamism and preparation have set an example that is followed by most ambitious players. Igor Stohl has selected the best and most instructive games from Kasparov's later years, and annotated them in great detail. The emphasis is on explaining the thoughts behind Kasparov's decisions, and the principles and concepts embodied by his moves. Stohl provides a wealth of fresh insights into these landmark games, together with many new analytical points. This makes the book outstanding study material for all chess enthusiasts. Garry Kasparov was born in 1963, and burst onto the scene in the late 1970s with a series of astonishing results in Soviet and international events. In 1985 he became the youngest world champion in history by defeating Anatoly Karpov in an epic struggle. When he announced his retirement from professional chess twenty years later, he was still world number 1. Kasparov is an internationally renowned figure, famous even among the non-chess-playing public.

“ Chuky, you ’ re a genius. ” Leading grandmasters have been heard to whisper these words, impressed with yet another brilliancy of Vassily Ivanchuk. The Ukrainian wizard, immensely popular with pros and amateurs alike, has been a member of the world elite for more than twenty years and is one of the most active players on the international circuit. Ivanchuk has finished first in all major tournaments in the world, at times with astonishing supremacy and always with deeply creative chess. He has won the Junior World Championship, the Blitz World Championship and reached the number two spot in the world rankings. Four times he was a member of the team that won the Chess Olympiad, once also claiming the individual gold medal on first board. The question why Ivanchuk, with his phenomenal talent and uncompromising passion for the game, has never become World Champion is something of a mystery. The inability to handle stress has been suggested and he himself has pointed at periods of ‘ black moods ’ or ‘ psychological crises ’ . Still, despite occasional erratic results, he has always maintained his position among the very best. For this book Correspondence Grandmaster and chess author Nikolay Kalinichenko has selected 100 of Vassily Ivanchuk ’ s best and most instructive games, explaining his moves and plans for club players. The result is a fascinating and rewarding journey to ‘ Planet Ivanchuk ’ , the extraterrestrial location where the sphinx from Lvov is said to receive his best brainwaves.

Jose Raoul Capablanca is widely regarded as the strongest chess player who ever lived prior to Bobby Fischer. The authoritative work, "The Rating of Chess Players Past and Present" by Arpad Elo, inventor of the modern rating system, ISBN 0923891277, rates Capablanca as 2725, higher than any other player in history prior to Fischer. The great thing about Capablanca's style of play is he tended to play simple, direct moves, moves that even an amateur player can find over the board. Jose Raul Capablanca y Graupera was the third World Champion, reigning from 1921 until 1927. Renowned for the simplicity of his play, his legendary endgame prowess, accuracy, and the speed of his play, he earned the nickname of the "Human Chess Machine." Jose Raul Capablanca (Havana, November 19, 1888 - New York, March 8, 1942) was a Cuban chess player, world chess champion from 1921 to 1927. Capablanca's ideas are still relevant on the world stage of chess. His images are a powerful aid to the student board secrets. Jose Raoul Capablanca one of the outstanding players of all time became world's chess champion in 1921 when he defeated Lasker by 4 to 0. During his lifetime he held all the world's major records. In twenty five years of tournament play he lost less than twenty-five games, while between 1916 and 1924 he lost not a single one."

Jan Timman is one of the greatest chess players never to win the world title. For many years ' the Best of the West ' belonged to the chess elite, collecting quite a few super tournament victories. Three times Timman was a Candidate for the World Championship and his peak in the world rankings was second place, in 1982. For this definitive collection, Timman has revisited his career and subjected his finest efforts to fresh analysis supported by modern technology. The result is startling and fascinating. From the games that he chose for his Timman ' s Selected Games (1994, also published as Chess the Adventurous Way), only 10(!) made the cut. Some games that he had been proud of turned out to be flawed, others that he remembered as messy were actually well played. Timman ' s Triumphs includes wins against great players such as Karpov, Kasparov, Kortchnoi, Smyslov, Tal, Spassky, Bronstein, Larsen and Topalov. The annotations are in the author ' s trademark lucid style, a happy mix of colourful background information and sharp, crystal-clear explanations. Once again Jan Timman shows that he is not only one of the best players the game has seen, but also as one of the best chess analysts and writers.
