The book describes the emergence of big data technologies and the role of Spark in the entire big data stack. It compares Spark and Hadoop and identifies the shortcomings of Hadoop that have been overcome by Spark. The book mainly focuses on the in-depth architecture of Spark and our understanding of Spark RDDs and how RDD complements big data's immutable nature, and solves it with lazy evaluation, cacheable and type inference. It also addresses advanced topics in Spark, starting with the basics of Scala and the core Spark framework, and exploring Spark data frames, machine learning using Mllib, graph analytics using Graph X and real-time processing with Apache Kafka, AWS Kinesis, and Azure Event Hub. It then goes on to investigate

Spark using PySpark and R. Focusing on the current big data stack, the book examines the interaction with current big data tools, with Spark being the core processing layer for all types of data. The book is intended for data engineers and scientists working on massive datasets and big data technologies in the cloud. In addition to industry professionals, it is helpful for aspiring data processing professionals and students working in big data processing and cloud computing environments.

As the sophistication of cyber-attacks increases, understanding how to defend critical infrastructure systems—energy production, water, gas, and other vital systems—becomes more important, and heavily mandated. *Industrial Network Security, Second Edition* arms you with the knowledge you need to understand the vulnerabilities of these distributed supervisory and control systems. The book examines the unique protocols and applications that are the foundation of industrial control systems, and provides clear guidelines

for their protection. This how-to guide gives you thorough understanding of the unique challenges facing critical infrastructures, new guidelines and security measures for critical infrastructure protection, knowledge of new and evolving security tools, and pointers on SCADA protocols and security implementation. All-new real-world examples of attacks against control systems, and more diagrams of systems Expanded coverage of protocols such as 61850, Ethernet/IP, CIP, ISA-99, and the evolution to IEC62443 Expanded coverage of Smart Grid security New coverage of signature-based detection, exploit-based vs. vulnerability-based detection, and signature reverse engineering

This volume brings together papers by eminent scholars analyzing the sociological bases of Indian politics. It focuses on the relationship modern politics has with changes in caste structure, religious communities, and other types of identity.

The main focus of the study is the deepening crisis of the Ethiopian education system. This study reconstructs the growth of the crisis of the sector during the last four decades. It then discusses the implications of the crisis in terms of communication breakdown; absence of analytical capacity at system level; the fragmentation of society; loss of

# Access Free Pgdca LI System Ysis And Design

political legitimacy and perpetuation of authoritarian power. Although the education sector has greatly expanded its impact on poverty alleviation has so far been insignificant. The poverty landscape has changed to the worse during the last fifty years. This is largely due to the fact that the Ethiopian education system is based on false premises. At the center of the crisis is the use of English as medium of instruction. The proficiency in English is so low that its continued use as a medium of instruction can only lead to the collapse of the education system. The study argues that it is only through language (readily understood and practiced) that collective life and the world can be interpreted in an integrated manner. The replacement of English by Ethiopian languages all the way from

the primary to tertiary levels is one of the factors that could strengthen the survival potential of the Ethiopian political community. The study is relevant for policy makers and students of development studies on the role of education in social change in Africa south of the Sahara.
