This second edition of the standard reference in the field has been entirely rewritten and updated to reflect the latest methods for the diagnosis and treatment of hearing loss, and the most recent practices in initiating a hearing conservation programme.:Maintaining and enhancing the comprehensive presentation of the first edition, Occupational Hearing Loss: explicates specific problems of occupational hearing loss and hearing conservation, and the principles of measuring hearing loss; shows how to establish damage risk criteria; summarizes the problems of hearing conservation in the diving industry; offers an expanded list of questions to be used when taking the histories of patients with otological complaints; explains the audiogram and its interpretation, including information about masking, and updates computerized audiometry; supplies new information about brain stem evoked-response audiometry, acoustic emission testing and other special hearing tests; delineates the causes of conductive hearing loss and their management; and discusses legislative and compensatory aspects of hearing loss, and gives in-depth information about calculating hearing impairment.:With over 1000 literature citations, tables and figures, Occupational Hearing Loss should be of use to occupational physicians, audiologists, health and safety engineers, industrial hygienists, otolaryngologists, residents, trial attorneys, judges, and upper-level undergraduate and graduate students in these disciplines.

CRC Handbook of Management of Radiation Protection Programs, 2nd Edition, is unique in that it offers practical guidance for managing various aspects of radiation protection programs ranging from the daily operation of a health physics office to the preparation of radiation experts for court appearances as professional witnesses. The book also covers such topics as organization and management of nonionizing radiation safety programs (with special emphasis on laser safety programs) and management of radioactive waste, personnel monitoring programs, radiation accident victims, internal exposure, relative radiotoxicity and radiation therapy patients. Other chapters discuss handling radiation accidents and education and training requirements for radiation protection. Legal aspects covered in the book include the history of radiation court cases, legal implications of record keeping, and preparation for court appearances. CRC Handbook of Management of Radiation Protection Programs, 2nd Edition will be a valuable reference resource for medical and health physicists, industrial hygienists, physicians, nuclear engineers, radiation protection regulators, radiation emergency management agents, radiation safety committees, and managers of facilities using ionizing and nonionizing radiation sources.

This volume presents a comprehensive introduction to the fundamental principles of ergonomics. It details the practical application of ergonomic principles in solving actual problems in the workplace, and reviews ergonomic case studies from various industries. It also contains helpful ergonomic tables; a work-saving list of vendors of ergonomic tools, software and video-training materials; and convenient ergonomic check lists.

This book describes how safety and other professionals may use safety database software on a personal computer to manage their safety and health programs. It emphasizes the techniques and features necessary to develop a computerized safety data system for a personal computer.

"Providing fundamental knowledge related to worker protection from chemical, thermal, and biological hazards, this practical reference focuses on recent scientific and technical developments in protective apparel systems. Introduces relevant health and safety legislation and rulings for worker safety!"

Provides managers, architects, plant engineers, technicians, and others with a concise background in the principles of fire protection and property loss control (a new chapter on life safety elements was added to the second edition). Some of the topics are the characteristics and behavior of fire, t
