Crap. We all have it. Filling drawers. Overflowing bins and baskets. Proudly displayed or stuffed in boxes in basements and garages. Big and small. Metal, fabric, and a whole lot of plastic. So much crap. Abundant cheap stuff is about as American as it gets. And it turns out these seemingly unimportant consumer goods offer unique insights into ourselves—our values and our desires. In *Crap: A History of Cheap Stuff in America*, Wendy A. Woloson takes seriously the history of objects that are often cynically-made and easy to dismiss: things not made to last; things we don't really need; things we often don't even really want. Woloson does not mock these ordinary, everyday possessions but seeks to understand them as a way to understand aspects of ourselves, socially, culturally, and economically: Why do we—as individuals and as a culture—possess these things? Where do they come from? Why do we want them? And what is the true cost of owning them? Woloson tells the history of crap from the late eighteenth century up through today, exploring its many categories: gadgets, knickknacks, novelty goods, mass-produced collectibles, giftware, variety store merchandise. As Woloson shows, not all crap is crappy in the same way—bric-a-brac is crappy in a different way from, say, advertising giveaways, which are differently crappy from commemorative plates. Taking on the full brilliant and depressing array of crappy material goods, the book explores the overlooked corners of the American market and mindset, revealing the complexity of our relationship with commodity culture over time. By studying crap rather than finely made material objects, Woloson shows us a new way to truly understand ourselves, our national character, and our collective psyche. For all its problems, and despite its disposability, our crap is us.

Exploring the blurred boundary between religion and pop culture, *God in the Details* offers a provocative look at the breadth and persistence of religious themes in the American consciousness. This new edition reflects the explosion of online activity since the first edition, including chapters on the spiritual implications of social networking sites, and the hazy line between real and virtual religious life in the online community *Second Life*. Also new to this edition are chapters on the migration of black male expression from churches to athletic stadiums, new configurations of the sacred and the commercial, and post 9/11 spirituality and religious redemption through an analysis of vampire drama, *True Blood*. Popular chapters on media, sports, and other pop culture experiences have been revised and updated, making this an invaluable resource for students and scholars alike.

In countries around the world, the rise of class divisions and unbridled capitalism are changing the conventional definitions of art and esthetics. Historically, the philanthropy of the elite has played a leading role in supporting, funding, and distributing artistic works. While such measures may be pure in intent, many worry that private funding may be gentrifying the arts and creating a situation in which art will only be valued for its prestige or, worse, its price tag. This collection of essays examines the current movement to democratize the arts and make the world of artistic endeavor open and accessible to all.
