The Persuasion Handbook provides readers with cogent, comprehensive summaries of research in a wide range of areas related to persuasion. From a topical standpoint, this handbook takes an interdisciplinary approach, covering issues of interest to interpersonal and mass communication researchers as well as psychologists and public health practitioners. Persuasion is presented in this volume on a micro to macro continuum, moving from chapters on cognitive processes, the individual, and theories of persuasion to chapters highlighting broader social factors and phenomena related to persuasion, such as social context and larger scale persuasive campaigns. Each chapter identifies key challenges to the area and lays out research strategies for addressing those challenges.

Vienna, 1909. When the celebrated actor Eugen Bischoff is found dead in his garden pavilion, suspicion falls immediately on Baron von Yosch, a well-to-do army officer who was once the lover of the dead man's wife. By all appearances the door was locked from the inside when the two shots rang out the actor took his own life, but someone, or something, drove him to it. The Baron sets out to learn all he can about the actor's death in order to clear his name. Meanwhile, within a few days, similar apparent suicides are reported. What started out as a straightforward quest to establish Bischoff's last deeds and discover the truth of his death becomes a search through the ages for an invisible enemy identified only by the actor's dying breath, when he whispered: . . . the Day of Judgment. Leo Perutz combines his hallmark blend of suspense and the fantastic in this spine-tingling mystery.

The Second Edition of The SAGE Handbook of Persuasion: Developments in Theory and Practice provides readers with logical, comprehensive summaries of research in a wide range of areas related to persuasion. From a topical standpoint, this handbook takes an interdisciplinary approach, covering issues that will be of interest to interpersonal and mass communication researchers as well as to psychologists and public health practitioners.

Most people have to communicate with colleagues every day and persuade them to understand their opinions or to accept their views. This handbook is intended for anyone who is interested in such goal-oriented language. It extracts 300 persuasive tactics from research findings in communication, linguistics, pragmatics and related fields, and presents them in a clear, concise and consistent manner. Such tactics as analogy, argument presentation, humour and metaphor are included. Each tactic is presented on a separate page with an analysis of its persuasive value. Two indexes - one by persuasive need and the other by tactic - allow readers full flexibility to use the handbook in their own way. This work should be of interest in courses which deal with the management of interaction, pragmatics, discourse analysis and communications.

"Electoral persuasion is central to democratic politics. It includes strategic communication not only by candidates and parties but also by interest groups, media, and citizens. This volume surveys the vast literature on this topic, emphasizing contemporary research and topics and complementing deep coverage of U.S. politics with international perspectives"--

The acclaimed New York Times and Wall Street Journal bestseller from Robert Cialdini— “ the foremost expert on effective persuasion ” (Harvard Business Review)—explains how it ’ s not necessarily the message itself that changes minds, but the key moment before you deliver that message. What separates effective communicators from truly successful persuaders? With the same rigorous scientific research and accessibility that made his Influence an iconic bestseller, Robert Cialdini explains how to prepare people to be receptive to a message before they experience it. Optimal persuasion is achieved only through optimal pre-suasion. In other words, to change “ minds ” a persuader must also change “ states of mind. ” Named a “ Best Business Books of 2016 ” by the Financial Times, and “ compelling ” by The Wall Street Journal, Cialdini ’ s Pre-Suasion draws on his extensive experience as the most cited social psychologist of our time and explains the techniques a person should implement to become a master persuader. Altering a listener ’ s attitudes, beliefs, or experiences isn ’ t necessary, says Cialdini—all that ’ s required is for a communicator to redirect the audience ’ s focus of attention before a relevant action. From studies on advertising imagery to treating opiate addiction, from the annual letters of Berkshire Hathaway to the annals of history, Cialdini outlines the specific techniques you can use on online marketing campaigns and even effective wartime propaganda. He illustrates how the artful diversion of attention leads to successful pre-suasion and gets your targeted audience primed and ready to say, “ Yes. ” His book is “ an essential tool for anyone serious about science based business strategies...and is destined to be an instant classic. It belongs on the shelf of anyone in business, from the CEO to the newest salesperson ” (Forbes).

This handbook provides a wide-ranging, authoritative, and cutting-edge overview of language and persuasion. Featuring a range of international contributors, the handbook outlines the basic materials of linguistic persuasion - sound, words, syntax, and discourse - and the rhetorical basics that they enable, such as appeals, argument schemes, arrangement strategies, and accommodation devices. After a comprehensive introduction that brings together the elements of linguistics and the vectors of rhetoric, the handbook is divided into six parts. Part I covers the basic rhetorical appeals to character, the emotions, argument schemes, and types of issues that constitute persuasion. Part II covers the enduring effects of persuasive language, from humor to polarization, while a special group of chapters in Part III examines figures of speech and their rhetorical uses. In Part IV, contributors focus on different fields and genres of argument as entry points for research into conventions of arguing. Part V examines the evolutionary and developmental roots of persuasive language, and Part VI highlights new computational methods of language analysis. This handbook is essential reading for those researching and studying persuasive language in the fields of linguistics, rhetoric, argumentation, communication, discourse studies, political science, psychology, digital studies, mass media, and journalism.

This timely set traces the evolution of social marketing from its deep roots in psychology, religion, and politics to its current role as an influencer of societal and behavioral change. • Includes contributions from scholars in the fields of marketing, psychology, health communications, sociology, environmental sustainability, economics, statistics, law, advertising, and journalism • Explains how to plan a campaign to encourage and facilitate behavioral change • Offers a rich set of applications in a wide variety of settings, including health, environment, family planning, food, well-being, and economic development, all with deep philosophic and theoretical grounding • Illuminates the variety of philosophical approaches to social marketing ranging from the idea that awareness alone can bring about change, to the view that persistent nudging will deliver results, to the position that only strong social control can create the "right" outcome
