In *Voyages*, Paul Jacobs takes us through his discovery of a passion for sailing, the joys of meeting and falling in love with Nancy Kaull, and the couples' experience together cruising on 36' sailboats in exotic locations all around the world with the Sunsail owners program. Paul describes the cruises with a scientist's precision, a sense of humor, and a humble perspective that will engage sailors and non-sailors alike. Nancy contributes a second perspective with detailed journal entries interspersed throughout the book. Together, the couple provides a story that's a successful fusion of a manual for travel to and bareboat sailing at numerous geographic locations, and a personal memoir, all in an interesting, informative, and inspiring work.

Cruising the Queensland Coast is a cruising guide for yachts cruising the Queensland coast. Each of the 13 coasts, from the Gold Coast to the Cooktown Coast, is covered in detail, including marinas, anchorages, passages, wind and wave averages, public pontoons and quick reference information and links for vital weather, search and rescue, notices to mariners and other vital information. It features hundreds of chartlets and high-resolution aerial photos of anchorages to take the guesswork out of anchoring. Each anchorage has information

on depth, bottom, mobile reception, marine park zone and recommended wind directions and strengths. The book is also integrated with Navionics and C-Map. Anchorages and passages can be imported into Navionics and C-Map simply by clicking on the Navionics link * and GPX link * icons throughout the book. The book also provides an extensive reference of useful information for the Queensland Coast such as skills and experience, recommended apps, charts and books, equipping the yacht for cruising, cruising logistics, climate and weather systems, marine hazards and the three major marine parks and their rules. This book will help get the first-time cruiser of the Queensland coast started. For those familiar with the coast, the wealth of information, data and links all pulled together into one place and organised in a systematic way will prove invaluable. For both, the more than one thousand external reference links make it easier to cruise the coast safely and simplify many of the everyday tasks of living on a cruising yacht such as finding and entering a marina and restocking once there.

Reeds Superyacht Manual, published in association with Bluewater Training, is a complete reference and training manual for everyone
