Because the risk was unknown, you won't really know what you are dealing with until after the crisis has fully passed. This is its own form of unknown. So, make sure that you are clear about getting all the information on the table ASA Having the clearest picture of what you should overcome will enable you to take the most aggressive action to get back on firm footing.

What would America look like if the liberals ultimately triumph, say by the year 2050? "WTF! This is a Liberal Utopia!" - a satire on liberalism, all the unintended consequences of this heart felt way of looking at the world around oneself, usually in the cloistered halls of academia, some government agency, some left-wing, nonprofit activist organization and, or congress. A really fantabulous glimpse at what the future holds when these magnificent, starry-eyed wonders finally come out on top! By 2050, America will have gone through some slight changes thus resulting in many really noteworthy phenomena. For one, there is no longer any need for elections: there will be a "Forever President" whose last name could be 'Castro.' Furthermore, odds are 'welfare moms' will have largely replaced small business

enterprises with their monthly, government stipends; most Americans will as likely as not have never worked, because it is distinctly possible that there won't be any save for those "shovel ready jobs" the Democrats will in all likelihood keep bringing up. Gaia, Mother Earth, will have probably been rescued from the threatening effects of "Global Warming," "Global Cooling," and "Climate Change," by turning to more agrarian economy where 'maze' is likely to be the cornerstone. For those lucky enough to own wheeled transportation, they will likely be driving around in either battery-powered, bubble cars made of styrofoam, or Latino lowriders which might look a lot like sparklers driving along the potholed highways of tomorrow. The English language will have been replaced by local, cultural colloquialisms with phonetics playing the principle role for making up words and phrases and writing them out. All this and more will be seen through the eyes of one of those liberal visionaries, an Ivy League English Professor whose name is Felix Schwartz; the narrator, the author and "the reader." A glimpse into our wondrous future and what awaits us all when the magnificent munificents are finally given the reins to take America down that 'Yellow Brick Road' to their utopian, imaginary 'World of OZ.' "WTF! This is a Liberal Utopia!"

Dr. Brooke Spencer always felt different from other girls. Now a successful scientist, she is finally discovering where she belongs: working alongside the brilliant, trailblazing researcher Dr. Charles Samuelson. Dr. Samuelson has recently made a discovery that has eluded philosophers and dreamers for centuries: How to transmute iron into gold. Determined to use the knowledge for good, Dr. Samuelson recruits Brooke to assist him with his new plan, his "Golden Manifesto." But humans are not alone and his discovery has not gone unnoticed. Extraterrestrial visitors seek to control Dr. Samuelson's Breakthrough, and before long, Brooke is all that stands between Earth and total Destruction. Will she be able to hold her ground? Or will the timeless temptation of gold prove too much for even the strongest of spirits? Brooke will soon face a choice that will make her question her background, her career, and the fate of the planet.
