Your comprehensive reference for sailboat racing Paul Elvstrom Explains the Racing Rules of Sailing hasaccompanied sailors to regattas since 1965. This newedition of the book—known to all simply as [Elvstrom]and famous for its plastic boats and wind arrows—incorporates the complete text of the InternationalSailing Federation's (ISAF) 2012 rules changes. It featurescolor-coded explanations and interpretations ofthe rules with the help of two-color bird's-eye-viewdrawings. It also offers a full-color chart of race signals,a graphic quick-reference locator for the rules, a summary of recent rules changes, and procedural notes forfiling a protest.

When engaging with other countries, the U.S. government has a number of different policy instruments at its disposal, including foreign aid, international trade, and the use of military force. But what determines which policies are chosen? Does the United States rely too much on the use of military power and coercion in its foreign policies? Sailing the Water's Edge focuses on how domestic U.S. politics—in particular the interactions between the president, Congress, interest groups, bureaucratic institutions, and the public—have influenced foreign policy choices since World War II and shows why presidents have more control over some policy instruments than others. Presidential power matters and it varies systematically across policy instruments. Helen Milner and Dustin Tingley consider how Congress and interest groups have substantial material interests in and ideological divisions around certain issues and that these factors constrain presidents from applying specific tools. As a result, presidents select instruments that they have more control over, such as use of the military. This militarization of U.S. foreign policy raises concerns about the nature of American engagement, substitution among policy tools, and the future of U.S. foreign policy. Milner and Tingley explore whether American foreign policy will remain guided by a grand strategy of liberal internationalism, what affects American foreign policy successes and failures, and the role of U.S. intelligence collection in shaping foreign policy. The authors support their arguments with rigorous theorizing, quantitative analysis, and focused case studies, such as U.S. foreign policy in Sub-Saharan Africa across two presidential administrations. Sailing the Water's Edge examines the importance of domestic political coalitions and institutions on the formation of American foreign policy.

What can the architecture of ancient ships tell us about their capacity to carry cargo or to navigate certain trade routes? How do such insights inform our knowledge of the ancient economies that depended on maritime trade across the Mediterranean? These and similar questions lie behind Sailing from Polis to Empire, a fascinating insight into the practicalities of trading by boat in the ancient world. Allying modern scientific knowledge with Hellenistic sources, this interdisciplinary collection brings together experts in various fields of ship archaeology to shed new light on the role played by ships and sailing in the exchange networks of the Mediterranean. Covering all parts of the Eastern Mediterranean, these outstanding contributions delve into a broad array of data: literary, epigraphical, papyrological, iconographic and archaeological to understand the trade routes that connected the economies of individual cities and kingdoms. Unique in its interdisciplinary approach and focus on the Hellenistic period, this collection digs into the questions that others don't think to ask, and comes up with (sometimes surprising) answers. It will be of value to researchers in the fields of naval architecture, Classical and Hellenistic history, social history and ancient geography, and to all those with an interest in the ancient world or the seafaring life.

Provides a comprehensive, behind-the-scenes look at the America's Cup race, tracing its history, skippers and their teams, and includes information on the science behind the ship building.

This bestselling pocket-sized racing rules book is unique in covering the rules by race situation. It explains the rules affecting each part of the race course, from the start line, round the marks and on to the finish line. The entire 2013-2016 racing rules are also included in this edition. This book is ideal for all racers because the rules are explained by race situation, using helpful diagrams to show the rules that apply all around the race course. The rules are graded for all levels of competition - club, national and international championship. This unique method of presentation has proved extremely popular with racers over ten editions.

The local authority and power company response to the severe weather of 2013 in Kintyre, Arran and Wigtonshire shows that important lessons have been learned and improvements put in place since the Committee last reported on this issue, in August 2012. The Committee is satisfied that all three councils affected by the severe weather have in place robust contingency planning for emergencies, which proved effective. Crucially, the compensation for those left without power - with all the damage that can cause - has been brought into line with the rest of the country. The Committee's conclusion's included that: emergency plans should prioritise accessing mobile phone base stations to restore lost signals; the A83 is a vital artery for the Kintyre peninsula and the decision to upgrade it to a trunk road is an important one, as this will allow the resources of Transport Scotland to be deployed to keep it open during extreme weather conditions; the new Hunterston-Kintyre transmission line will mean there will be two transmission lines serving the Kintyre peninsula, so the failure of one of the lines will not see Kintyre & Arran cut off from the power network; and caring for vulnerable members of the community is another statutory responsibility of local authorities: local authorities have done a great deal of work to expand their databases and identify those who are in need but councils should also do more to support the community groups that are engaging local people in the process of caring for the vulnerable

Written by a sailing Olympian, this has been the most-trusted reference for racing sailors around the world for over 45 years and has sold 320,000 copies in the English language alone. The unique approach devised by Paul Elvstrom offers bird's-eye views and detailed explanations of how the rules are applied to racing situations, with each cross-referenced to the relevant case studies provided by World Sailing (formerly ISAF). Completely revised to cover the new rules for 2017-2020, Paul Elvstrom Explains also includes the full text of the racing rules, with a handy quick-reference guide highlighting the latest changes. There is also a confidence-building section on how to present your case in a protest and the back cover shows signal flags for easy reference on the race course. This is the perfect pocket reference for racers in every type of boat: dinghy, keelboat or yacht.

'Monumental' - Bob Ross, Australian Sailing High Performance Sailing is now regarded as the bible of racing sailors and carries a string of endorsements from high achievers. Since its publication in 1984, racing yachts and dinghies have developed out of all recognition - a new high-tech breed of 'apparent wind' fast racers has claimed the water and so far no-one has applied themselves seriously to analysing what makes these boats sail fast (and what will make them faster). This is Frank Bethwaite's ground-breaking achievement in Higher Performance Sailing. By means of extensive research, and working with sailors of different racing calibre, Bethwaite analyses how to harness the apparent wind for increased speed and better position on your rivals. Higher Performance Sailing will provide the key to racing sailors' dreams. Praise for Bethwaite's High Performance Sailing: 'It represents a breakthrough...It is a book that my Olympic squad will benefit from.' Rod Carr, former British Olympic Sailing Team Manager 'Allowed only one 'if only' in yacht racing, it would have been to have read Higher Performance Sailing years ago.' Bob Fisher, journalist, broadcaster and international championship winner

Nigel Sharp explores the fascinating history of St Mawes Sailing Club.
