Written for secondary school teachers, this resource expands educators' understanding of the relationship between their students and digital media and shows how to design learning opportunities that make the most of that relationship. Read the New York Times bestseller and companion to Newbery Honor winner Savvy! It's nine years after Savvy, and Mibs' cousin Ledge is on the verge of turning thirteen. More than anything, he wants the power to run like the wind. But when his birthday comes, he discovers that his savvy is actually making things fall apart. It starts out with small things, but then it gets worse. To top it all off, someone outside the family has witnessed his destruction. Now, in addition to trying to figure out how to control - or scumble - his savvy, he's got to worry about how to protect the family secrets. Over the course of one amazing summer, Ledge learns a lot about himself and his family, makes a new - and very unlikely - friend, and learns to appreciate his newfound skills. "Readers will delight in the tall-tale tropes and Ledge's authentic physical, emotional, and artistic challenges." - Booklist, starred review "The title stands alone in its fast-paced plot with twists and turns galore, and readers familiar with Savvy will eat it up and wish for more." - School Library Journal

Pre-service and graduate teachers need a book which is simple in construct, is memorable for practice, and which is easily accessible for when they face a challenging behaviour or situation in their teaching. There is no single answer nor one right way to manage student behaviour or a class situation. Instead, there are a range of effective and skilful ways of enabling students to respond cooperatively, take responsibility and learn to manage their own behaviour. This book is made up of two parts. Part A clearly outlines the practical strategies, skills and techniques that every graduate teacher needs to know, understand and be able to apply, in order to skilfully manage their students, their classes and collegial relationships within the school community. The ultimate goal for teachers is not only to learn to manage the behaviour they meet on a daily basis, but also to enable their students to learn to manage themselves, their own behaviour, relationships and their learning. Part B presents common questions that graduate teachers ask throughout their first year of teaching. This section allows

readers to dip in and read a suggested solution to a problem that they are facing, with cross references to Part A, which will expand on the theory, relevant strategies, skills, and techniques.
