Drucker on Asia is written in two parts (Times of Challenge & Time to Reinvent) which is the result of a dialogue between Peter Drucker and Isao Nakauchi on international themes. Drucker On Asia is the result of extensive dialogue between two of the world's leading business figures, Peter F Drucker and Isao Nakauchi. Their dialogue considers the changes occurring in the economic world today and identifies the challenges that free markets and free enterprises now face with specific reference to China and Japan. * What do these economic changes mean for an individual country and its economy? * What do these changes mean to society; the individual company; the individual professional and executive? These are the questions that Drucker and Nakauchi address in their brilliant insight into the future economic role of Asia.

The Future of Industrial Man is the only book by Peter Drucker in which he systematically develops a basic social theory. He presents the requirements for any society to be functioning and legitimate, and then applies these general concepts to the special case of the industrial society. In his new introduction, Drucker explains that his reference to mercantilism in The Future of Industrial Man can today be called neoconservatism, which, he asserts, denies rather than affirms the reality of industrial and postindustrial society. Drucker outlines the major shifts of previous centuries. He describes the move from an agrarian to an industrial economy, illustrates the structure and dynamics of this new industrial order, and warns of the abuses inherent in the system if attempts are made to maintain it under anachronistic social conventions. He emphasizes the fact that the new industrial order must operate under a "legitimate" system of po-litical power supported by social authority. He discusses the particular roles of the owners, the workers, the managers—the corporation itself—as he pinpoints the problem that he considers the most central and the most critical: how to maintain the continuing freedom of the individual in an increasingly intricate, bureaucratized world. Following the initial publication of this work, Jacques Barzun wrote in The New Republic, "Here is a book which is so perfectly planned and so transparently written as to read with almost indecent ease. . . . Each page is the fruit of much learning and long reflection. It should accordingly be studied, pondered over, ana-lyzed word by word." According to W. H. Chamberlain of The Atlantic Monthly, "[Drucker] possesses a fund of historical and economic knowledge." The Future of Industrial Man is a landmark study by a noted analyst of the modern corporation. It is of continuing importance to economists, industrial studies scholars, and profes-sional

The Age of Discontinuity: Guidelines to Our Changing Society describes the discontinuities that are changing the structure and the meaning of economy, politics, and society. Major discontinuities exist in four areas: the knowledge technologies; changes in the world's economy; a society of organizations; and the knowledge society. This book is organized into four parts encompassing 17 chapters. Each part represents the four areas of discontinuities. Part I highlights the growth in major industries and businesses, along with economic policies related to tax incentives. Part II looks into the status of the global economy, the disparity between the rich and poor countries, and the concepts and application of the economic theory demonstrating a closed economy controlled from within by national, monetary, credit, and tax policies. Part III examines the changes in the political matrix of social and economic life. This part deals particularly with the theory of pluralism and organizations, as well as the creation of socio-political reality. Part IV focuses on the changes in the cost center and the crucial resource of the economy. Knowledge changes involve changes in labor forces and work. This book will prove useful to economists, public servants, sociologists, and researchers.

Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships – except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to improve their knowledge.
