This book is a practical compendium of assessment instruments and intervention ideas for school-based speech-language pathology who are eager to take their practice beyond traditional language tests and caseload concerns. The manual focuses on three areas of language where language impaired children in elementary school need particular help: phonological awareness, narrative skills, and advanced literacy skills (identifying and stating the main idea, for example). Inside, the reader will find non-standardized assessment tasks, sample interventions activities, sample goals, and objectives and sample lesson plans. These tools provide a framework onto which the clinician can graft activities and materials appropriate for individual children. This is a practical, useful, reality based book of assessment tasks and intervention ideas. It will also provide ideas for helping children who lack these abilities, for writing appropriate goals and objectives and for sharing information about the child's progress with teachers and parents.

Each two-volume book contains four major sections: . - Introduction and Overview: Provides forewords by notables in the field and an outline of the book. - Essays: Features eight to 10 essays on topics such as workplace issues, financial aid, diversity, and more. - Directory: Contains descriptions and contact information for hundreds of organizations, schools, and associations, arranged by topic. - Further Resources/Indexes: Includes glossaries, appendixes, further reading, and indexes

A Volume in the Singular Resource Guide Series. Seamless evaluation and remediation of speech sound disorders is the goal of this unique text, which focuses on service effectiveness and efficiency. Offering a broad-spectrum view, the Articulation and Phonology Resource Guide for School-Age Children and Adults provides solid, comprehensive information for clinicians working with clients ranging from preschoolers with speech sound disorders to adults who speak English as a second language. The author blends traditional techniques with newer practices, while providing guidance on how to select the best approach for each client. The book is a roadmap with commentary-enabling clinicians to best chart the courses for their caseloads.

This comprehensive sourcebook covers every aspect of school service delivery, arming practitioners with the nuts and bolts of evidence-based practice. Each of the 114 chapters serves as a detailed intervention map, beginning with a summary of the problem area and moving directly into step-by-step instructions on how to implement an evidence-based program with distinct goals in mind and methods to measure the outcome. School-based professionals in need of ready access to information on mental health disorders, developmental disabilities, health promotion, child abuse, dropout prevention, conflict resolution, crisis intervention, group work, family interventions, culturally competent practice, policy, ethics, legal issues, community involvement, accountability, and funding can now find high-quality and easy-to-implement strategies at their fingertips. A concise, user-friendly format orients readers to each issue with a Getting Started section, then moves smoothly into What We Know, What We Can Do, Tools and Practice Examples, and Points to Remember. Quick-reference tables and charts highlight the most important information needed for daily reference, and lists of further reading and Web resources guide readers in gathering additional information to tailor their practice to suit their students' needs. Each chapter has been specifically crafted by leaders in their fields with the ultimate goal of giving school-based practitioners the tools they need to deliver the best mental health and social services possible to students, families, and communities. This is a must-have reference for all school-based social workers, psychologists, counselors, mental health professionals, and educators.

A concise, up-to-date review of school neuropsychological assessment that covers effective treatment planning The third edition of Essentials of School Neuropsychological Assessment offers a practical and concise overview of neuropsychological practice in schools and other pediatric clinical settings and clearly explains how to identify the need for testing. The book shows how to collect a neurodevelopmental history, choose appropriate assessment instruments, effectively evaluate students, and accurately interpret results. The third edition has been revised and updated to include the most recent advances in the field such as major neuropsychological test batteries for children, including NEPSY-II, Wechsler Intelligence Scale for Children, Fifth Edition integrated, and Delis-Kaplan Executive Function System. In addition, the new edition contains updated online tools, including sample case studies, searchable databases of neuropsychological tests classified by processing area and conceptual model, a neuropsychological processing concerns checklist in both English and Spanish, and sample report shells with tables. Like all the volumes in the Essentials of Psychological Assessment series, this book is designed to help busy practitioners and school psychologists quickly acquire the knowledge and skills they need to make optimal use of major psychological assessment instruments. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. Essentials of School Neuropsychological Assessment, Third Edition contains unmatched guidance and direction for school psychologists and other mental health professionals who serve educators, school children, and their families.

With so few therapeutic outlets readily available to young people, schools have evolved into mental health centers for many students. Yet schools are hampered by limited access to resources needed to provide mental health promotion, prevention, and intervention services. Like its acclaimed predecessor, the Second Edition of the Handbook of School Mental Health offers ways for professionals to maximize resources, make and strengthen valuable connections, and attain more effective school-based services and programming. At the same time, the Handbook provides strategies and recommendations in critical areas, such as workforce development, interdisciplinary collaborations, youth/family engagement, consultation, funding, and policy concerns, summarizes the state of current research, and offers directions for further study. Chapters model best practices for promoting wellness and safety, early detection of emotional and behavioral problems, and school-based interventions for students with anxiety, depression, attention deficit hyperactivity disorder, and other common challenges. In spotlighting this range of issues, the contributors have created a comprehensive game plan for advancing the field. Among the Handbook's topics: Pre-service training for school mental health clinicians. Cognitive-behavioral interventions for trauma in schools. Increasing parental engagement in school-based interventions. Models of psychiatric consultation to schools. Culturally competent behavioral and emotional screening. Bullying from a school mental health perspective. Prevention and intervention strategies related to a variety of mental health problems in schools. The Second Edition of the Handbook of School Mental Health is an essential reference for researchers, graduate students, and other professionals in child and school psychology, special and general education, public health, school nursing, occupational therapy, psychiatry, social work and counseling, educational policy, and family advocacy.
