Standing in the Shadows of Motown - Wikipedia

The phenomenal story of Motown has been told many times--so many times in fact that the notion of an untold part of its legacy seems far-fetched. But as the documentary film Standing in the Shadows of Motown demonstrates, there was more to the success of the Detroit-based label than singing babes in gowns and founder Berry Gordy's business acumen. There were also the self-named Funk Brothers: the session players putting the unforgettable guitar sounds into "You Keep Me Hangin' On" and the ...

"A call to action shedding light on the issue of depression in black men and the barriers that prevent too many from seeking and receiving care."--Rosalynn Carter, former U.S. First Lady, and chairperson, The Carter Center Mental Health Task Force In mainstream society depression and mental illness are still somewhat taboo subjects; in the black community they are topics that are almost completely shrouded in secrecy. As a result, millions of black men are suffering in silence or getting treatment only in extreme circumstances--in emergency rooms, homeless shelters, and prisons. The neglect of emotional disorders among men in the black community is nothing less than racial suicide. In this groundbreaking book, veteran journalist and award-winning author John Head argues that the problem can be traced back to the time of slavery, when it was believed that blacks were unable to feel inner pain because they had no psyche. This myth has damaged generations of African American men and their families, creating a society that blames black men for being violent and aggressive without considering that depression might be a root cause. Black Men and Depression challenges the African American community and the psychiatric community to end the suffering of black men, and address what can be done by loved ones to help those who need it most. Previously published as Standing in the Shadows

A first-of-its-kind exploration of black men and depression from an award-winning journalist. The first book to reveal the depths of black men's buried mental and emotional pain, Standing in the Shadows weaves the author's story of his twenty-five-year struggle with depression with a cultural analysis of how the illness is perceived in the black community--and why nobody wants to talk about it. In mainstream society depression and mental illness are still somewhat taboo subjects; in the black community they are topics that are almost completely shrouded in secrecy. As a result, millions of black men are suffering in silence or getting treatment only in the most extreme circumstances--in emergency rooms, homeless shelters, and prisons. The neglect of emotional disorders among men in the black community is nothing less than racial suicide. John Head's explosive work, Standing in the Shadows, addresses what can be done to help those who need it most.In this groundbreaking book, veteran journalist and award-winning author John Head argues that the problem can be traced back to slavery, when it was believed that blacks were unable to feel inner pain because they had no psyche. This myth has damaged generations of African American men and their families and has created a society that blames black men for being violent and aggressive without considering that depression might be a root cause. The author also explores the roles of the black church, the black family, and the changing nature of black women in American culture as a way to understand how the black community may have unwittingly helped push the emotional disorders of African American men further underground. As daring and powerful as Nathan McCall's Makes Me Wanna Holler, Standing in the Shadows challenges both the African American community and the psychiatric community to end the silent suffering of black men by taking responsibility for a problem that's been ignored for far too long. Additionally, Standing in the Shadows gives women an understanding of depression that enables them to help black men mend their relationships, their families, and themselves.

I have heard it said that we all shall pay for the sins of the father. Someone once told me that when the next generation has it rough, its because they are reaping what the generation before them has sowed. This is what Creole people would call Blood Magic in the Basement (or so Ive been told). I am Vernon Lucas II and my father was a kingpin in the heroin drug trade. I cant say that my adult life has been easy, but at least as a child I never really wanted for anything. Ive been told that since my family has helped to poison many people in America with illegal drugs, that I was cursed to suffer in my adult life for their sins. I almost believed that for a time. I felt very restless in my adult life and very few goals that I set for myself ever worked out for me. I felt ashamed and even embarrassed by my family, until I began to research the reasons why they did what they did in the first place. My father and his brothers came from very humble beginnings. His mother, my Grandmother was a field hand/housewife and her husband, my Grandfather was a share cropper as well as a bootlegger. They lived, loved and struggled in the segregated south of the early 1900s. There have been rumors about how mean my Grandfather was, but by the time I had to live with him he was much kinder and gentler. My Fathers brother, Frank Lucas was at least 20 years older than he was, so it was natural for him to look up to my Uncle Frank as not only an older brother but also as somewhat of a Father figure. Frank left home at a very early age to make his own way in life and turned to a life of crime out of necessity. He became one of the best at what he did. It was just a matter of time before my father eventually followed in his footsteps. I am by no means condoning what they did in the 60s & 70s I just want to let it be known that they were not Harvard Educated, to say the least and they felt that they didnt have much choice in what they did. To follow their American dream, they sold narcotics and cut out the middle man in doing so. This allowed them to sell it very pure and inexpensive. Needless to say, it pissed a lot of people off. Once they made their fortune, they invested within their community, gave an economic boost to many minorities across America, as well as paying back taxes and saving the homes of certain celebrities. These were only some of the positive things that they accomplished. The real story is that of the Country Boys. Even though there wouldnt be any Country Boys without the help of my Uncle Frank. The Country Boys and Frank Lucas were 2 completely separate entities. It took the help of the Country boys to expand Frank Lucas empire and even though it started out with number running and narcotics, it eventually became so much more. My father, Vernon (Shorty) Lucas Sr. helped run the Country Boys and with the help of his brothers he was able to pull his family and everyone he knew out of obscurity and poverty. Frank wasnt very proud of what he felt he had to do to make a living so he lied to his mother and told her that he was a business man. When he brought her up north from North Carolina he Lived in New York and set his Parents and most of his siblings up in Northern New Jersey. This autobiographical tale gives firsthand insight on what it was actually like growing up in such a household. I have decided to share at least the first 30 years of my life to show exactly what I personally went through as the son of an American Gangster. It has been an emotional roller coaster for me and I cannot determine which came first; the chicken or the egg. Meaning: Was my lifes emotional instability inherited, or was it caused by the way I had to live? You be the judge. I am hoping this autobiography serves some as a manual as well as entertainment through self education. So in synopsis, what Im trying to convey is that the Lucas family is so much more than this gangster image

Widely regarded as one of the best football players to ever tie on a pair of cleats, Walter Payton led a fascinating and ultimately tragic life.
