Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Nascita, cibo, sesso, morte: sono quattro esperienze fondamentali della vita umana, che la definiscono e la sintetizzano e che ognuno di noi deve affrontare. Ma la tecnologia sta spingendo sempre più in là le frontiere, i limiti stessi di queste esperienze, cambiandone il significato. Cosa succederebbe se potessimo avere figli senza gravidanze? Se potessimo avere rapporti sessuali soddisfacenti senza bisogno di altri esseri umani? Se potessimo mangiare cibo creato in

laboratorio? Se potessimo morire quando vogliamo, in modo del tutto indolore? Jenny Kleeman ha scritto un reportage sul futuro (prossimo) di eros, cibo, morte e nascita: ha intervistato robot del sesso coscienti e senzienti, indistinguibili dagli esseri umani, ha assaggiato la carne allevata in provetta e ha partecipato a incontri riservatissimi dove si danno alle persone gli strumenti tecnici per morire quando desiderano, nel modo meno doloroso possibile. Ha visto cose, insomma, che noi umani non potremmo neppure immaginarci e ha intervistato i loro creatori, per capire quale sia il limite oltre il quale non potremo più definirci umani. Ammesso che ce ne sia uno.

Warren Buffett is the most famous investor of all time and one of today's most admired business leaders. He became a billionaire and investment sage by looking at companies as businesses rather than prices on a stock screen. The first two editions of The Warren Buffett Way gave investors their first in-depth look at the innovative investment and business strategies behind Buffett's spectacular success. The new edition updates readers on the latest investments by Buffett. And, more importantly, it draws on the new field of behavioral finance to explain how investors can overcome the common obstacles that prevent them from investing like Buffett. New material includes: How to think like a long-term investor – just like

Buffett Why “loss aversion”, the tendency of most investors to overweight the pain of losing money, is one of the biggest obstacles that investors must overcome. Why behaving rationally in the face of the ups and downs of the market has been the key to Buffett’s investing success Analysis of Buffett’s recent acquisition of H.J. Heinz and his investment in IBM stock The greatest challenge to emulating Buffett is not in the selection of the right stocks, Hagstrom writes, but in having the fortitude to stick with sound investments in the face of economic and market uncertainty. The new edition explains the psychological foundations of Buffett’s approach, thus giving readers the best roadmap yet for mastering both the principles and behaviors that have made Buffett the greatest investor of our generation.

From Robin Sloan, author of Mr. Penumbra's 24-Hour Bookstore, the story of Mr. Penumbra's first trip to San Francisco—and of how he got entangled with the city's most unusual always-open enterprise... It is August 1969. The Summer of Love is a fading memory. The streets of San Francisco pulse to the sounds of Led Zeppelin and Marvin Gaye. And of jackhammers: A futuristic pyramid of a skyscraper is rising a few blocks from City Lights bookstore and an unprecedented subway tunnel is being built under the bay. Meanwhile, south of the city,

orchards are quickly giving way to a brand-new industry built on silicon. But young Ajax Penumbra has not arrived in San Francisco looking for free love or a glimpse of the technological future. He is seeking a book—the single surviving copy of the *Techne Tycheon*, a mysterious volume that has brought and lost great fortune for anyone who has owned it. The last record of the book locates it in the San Francisco of more than a century earlier, and on that scant bit of evidence, Penumbra's university has dispatched him west to acquire it for their library. After a few weeks of rigorous hunting, Penumbra feels no closer to his goal than when he started. But late one night, after another day of dispiriting dead ends, he stumbles across a 24-hour bookstore, and the possibilities before him expand exponentially . . .

Compassionate and profound in their wry humor, this collection of stories captures the poetry of human relationships at the point where reality and imagination meet.

Between February 2013 and November 2014 I visited Detroit six times, for a total of 77 days. After three years living in Brooklyn, I found in Detroit what I had been looking for when I left Italy and crossed the Atlantic Ocean. Space, both physical and for the imagination. That is why it only took me two days to decide to write my first book. An emotional and practical book about the city, mapped through a series of encounters with its people. I raised the money needed to start the project, managed to drive an automatic car and learned how to fix a bike tire. Over the course of two years I have collected stories, ideas and feelings, set within what seems to be a real movement of urban resistance. I trained my eye to observe silent urban landscapes, on which huge blocks of sky and abandoned buildings impose themselves, and I realized that fear and fascination for decay quickly take second place. It has been like developing a way of seeing that is more like a way of listening, toward a world which can be complex and harsh at times, but also full of an energy that only appears when determination and potential meet. I invited an artist, Antonio Rovaldi, to join me and illustrate this journey. This is the result of our work. (F.B.)

Virus of the Mind is the first popular book devoted to the science of memetics, a controversial new field that transcends psychology,

biology, anthropology, and cognitive science. Memetics is the science of memes, the invisible but very real DNA of human society. In *Virus of the Mind*, Richard Brodie carefully builds on the work of scientists Richard Dawkins, Douglas Hofstadter, Daniel Dennett, and others who have become fascinated with memes and their potential impact on our lives. But Richard goes beyond science and dives into the meat of the issue: is the emergence of this new science going to have an impact on our lives like the emergence of atomic physics did in the Cold War? He would say the impact will be at least as great. While atomic bombs affect everybody's life, viruses of the mind touch lives in a more personal and more pernicious way. Mind viruses have already infected governments, educational systems, and inner cities, leading to some of the most pervasive and troublesome problems of society today: youth gangs, the welfare cycle, the deterioration of the public schools, and ever-growing government bureaucracy. Viruses of the mind are not a future worry: they are here with us now and are evolving to become better and better at their job of infecting us. The recent explosion of mass media and the information superhighway has made the earth a prime breeding ground for viruses of the mind. Will there be a mental plague? Will only some of us survive with our free will intact? Richard Brodie weaves together science, ethics, and current events as he raises these and other very disturbing questions

about memes.

With a foreword by Alex Osterwalder. The future of work is already here. Customers are adopting disruptive technologies faster than your company can adapt. When your customers are delighted, they can amplify your message in ways that were never before possible. But when your company's performance runs short of what you've promised, customers can seize control of your brand message, spreading their disappointment and frustration faster than you can keep up. To keep pace with today's connected customers, your company must become a connected company. That means deeply engaging with workers, partners, and customers, changing how work is done, how you measure success, and how performance is rewarded. It requires a new way of thinking about your company: less like a machine to be controlled, and more like a complex, dynamic system that can learn and adapt over time. Connected companies have the advantage, because they learn and move faster than their competitors. While others work in isolation, they link into rich networks of possibility and expand their influence. Connected companies around the world are aggressively acquiring customers and disrupting the competition. In *The Connected Company*, we examine what they're doing, how they're doing it, and why it works. And we show you how your company can use the same principles
