2.8 Figure 2 sets out the bursary rates for academic year (AY) 2014/15. These are relevant to (AY) 2014/15 only and do not provide assurances about any future bursary rates. We advise against providers giving any assurance to potential trainees on future bursary rates until these are released by the Department for Business Innovation and Skills.

This open access book presents the major outcomes of the fourth edition of the Future of Higher Education ¶ Bologna Process Researchers Conference (FOHE-BPRC 4) which was held in January 2020 and which has already established itself as a landmark in the European higher education environment. The conference is part of the official calendar of the European Higher Education Area (EHEA) for events that promote and sustain the development of EHEA. The conference provides a unique forum for dialogue between researchers, experts and policy makers in the field of higher education, all of which is documented in this proceedings volume. The book focuses on the following five sub-themes: - Furthering the Internationalization of Higher Education: Particular - Challenges in the EHEA - Access and Success for Every Learner in Higher Education - Advancing Learning and Teaching in the EHEA: Innovation and Links With Research - The Future of the EHEA - Principles, Challenges and Ways Forward - Bologna Process in the Global Higher Education Arena. Going Digital? While acknowledging the efforts and achievements so far at EHEA level, the Paris Ministerial Communiqué highlights the need to intensify crossdisciplinary and cross-border cooperation. One of the ways to achieve this objective is to develop more efficient peer-learning activities, involving policymakers and other stakeholders from as many member states as possible for which this book provides a platform. It acknowledges the importance of a continued dialogue between researchers and decisionmakers and benefits from the experience already acquired, this way enabling the higher education community to bring its input into the 2020. European Higher Education Area (EHEA) priorities for 2020 onwards. European Higher Education Area: Challenges for a New Decade marks 21 years of Bologna Process and 10 years of EHEA and brings together an unique collection of contributions that not only reflect on all that has been achieved in these years, but more importantly, shape directions for the future. This book is published under an open access CC BY license.

The ICAEM2014 aims to bring together researchers, educators and students from around the world in both industry and academia for sharing the state-of-art research results and applications, for exploring new areas of research and development, and for discussing emerging issues on education and management fields. We received a total of 312 submissions from various parts of the world. The Technical Program Committee worked very hard to have all papers reviewed before the review deadline. The final technical program consists of 92 papers. There are one keynote speech and 2 invited sessions. The proceedings were published by DEStech Publications, Inc. and will submitted to Ei Compendex databases for indexing. We would like to mention that, due to the limitation of the conference venue capacity, we are not able to include many fine papers in the technical program. Our apology goes to those authors.

Chapters in this volume discuss the impact of statewide political transformation on teacher education programs.

Education in the Arab World is a critical reference guide to development of education in Algeria, Bahrain, Egypt, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Palestine, Qatar, Saudi Arabia, Sudan, Syria, Tunisia, the United Arab Emirates and Yemen. The chapters, written by local experts, provide an overview of the education system in each country, as well as discussion of educational reforms and socio-economic and political issues. Including a comparative introduction to the issues facing education in the region as a whole, this book is an essential reference for researchers, scholars, international agencies and policy-makers.

Home to the largest per capita reserves and fourth-largest total reserves of crude oil within OPEC, Kuwait's public finances have suffered in 2016 following the rapid decline in oil prices, which drove oil revenues down from \$108.6bn in 2013 to \$51.8bn in 2015. Despite this Kuwait has resisted significant budgetary cutbacks: spending levels in 2016 were cut by just 1.6%, and the considerable financial buffers built up from budget surpluses in the years leading up to 2014 are expected to cushion the budget deficit. The country continues to push ahead with key public investments, with Parliament allocating \$155bn to the Kuwait Development Plan 2015-20 to fund infrastructure, utilities and housing developments. The plan focuses on further integrating the private sector into areas of the economy traditionally under state control and aims to raise the non-oil sector's GDP contribution to 64% in 2015-20, up from an average of 45.1% in 2010-13. Elsewhere promising moves are being made to cut state subsidies, with the government opting to liberalise diesel and kerosene prices and reduce subsidies on aviation fuel in January 2015, generating savings equal to 0.3% of GDP.

The two-volume set LNCS 9722 and LNCS 9723 constitutes the refereed proceedings of the 21st Australasian Conference on Information Security and Privacy, ACISP 2016, held in Melbourne, VIC, Australia, in July 2016. The 52 revised full and 8 short papers presented together with 6 invited papers in this double volume were carefully revised and selected from 176 submissions. The papers of Part I (LNCS 9722) are organized in topical sections on National Security Infrastructure; Social Network Security; Bitcoin Security; Statistical Privacy; Network Security; Smart City Security; Digital Forensics; Lightweight Security; Secure Batch Processing; Pseudo Random/One-Way Function; Cloud Storage Security; Password/QR Code Security; and Functional Encryption and Attribute-Based Cryptosystem. Part II (LNCS 9723) comprises topics such as Signature and Key Management; Public Key and Identity-Based Encryption; Searchable Encryption; Broadcast Encryption; Mathematical Primitives; Symmetric Cipher; Public Key and Identity-Based Encryption; Biometric Security; Digital Forensics; National Security Infrastructure; Mobile Security; Network Security; and Pseudo Random/One-Way Function.

The E-Medicine, E-Health, M-Health, Telemedicine, and Telehealth Handbook provides extensive coverage of modern telecommunication in the medical industry, from sensors on and within the body to electronic medical records and beyond. Telehealth and Mobile Health is the second volume of this handbook. Featuring chapters written by leading experts and researchers in their respective fields, this volume: Discusses telesurgery, medical robotics, and image guidance as well as telenursing and remote patient care Describes the implementation of networks, data management, record management, and effective personnel training Explains how the use of new technologies brings many business, management, and service opportunities Provides examples of scientific advancements such as brain-controlled bionic human arms and hands Incorporates clinical applications throughout for practical reference The E-Medicine, E-Health, M-Health, Telemedicine, and Telehealth Handbook bridges the gap between scientists, engineers, and medical professionals by creating synergy in the related fields of biomedical engineering, information and communication technology, business, and healthcare.

Academic exchange is one of the cornerstones of public diplomacy. Receiving foreign academics is one way of influencing foreign elites in an attempt to build goodwill and stable international networks. The result is that academic mobility and the internationalization of higher education and research have always been directly affected by foreign policy decisions and diplomatic considerations ¶ and still are. In Public Diplomacy and Academic Mobility in Sweden, Andreas Åkerlund analyses Sweden's scholarship programs for foreign academics in a long-term perspective. Here a quantitative analysis of scholarship holders is related to Swedish exchange policy and grant practices by looking at the Swedish Institute in particular. The result is an account of how public diplomacy, foreign policy, development assistance, and the ideas of a knowledge-based economy and international competition affected academic exchanges with Sweden in the twentieth century.

In recent years the constitutional landscape of Southeast Asia has changed tremendously. Against a worldwide background of liberalization, globalization, and democratization, states in the region have begun to alter their constitutions, reinforcing human rights provisions, and putting in place institutional safeguards, such as constitutional courts and human rights commissions. On closer examination, however, the picture is very complex, with constitutional developments differing greatly between states. This book explores a range of current constitutional developments in the different states of Southeast Asia through a distinct political lens. Drawing on comparative and single case studies, it considers various constitutional areas, including constitution drafting, human rights, legal safeguards and the continuing role of the military, sets constitutional developments in the wider political and historical context of each country, and makes comparisons both with Western democracies and with other developing regions. The book concludes by assessing overall how far constitutional practices and trajectories are converging towards a liberal Western model or towards a distinctly Southeast Asian model.

This book constitutes the post-conference proceedings of the First International Conference on Smart Grid Inspired Future Technologies, SmartGIFT 2016, held in May 2016 in Liverpool, UK. Smart grid is the next generation electric grid that enables efficient, intelligent, and economical power generation, transmission, and distribution. The 25 revised full papers presented were reviewed and selected from 36 submissions. The papers cover technical topics such as high-level ideology and methodology, concrete smart grid inspired data sensing, processing, and networking technologies, smart grid system architecture, Quality of Service (QoS), energy efficiency, security in smart grid systems, management of smart grid systems, service engineering and algorithm design, and real-world deployment experiences.
