De Sunny & Tim verhalen hebben als doel kinderen op een begrijpelijke en toegankelijke manier uitleg te geven over de nucleaire geneeskunde. Eerder verschenen "Lichtjes in je lichaam" en "Wil jij de fotodokter helpen" waarin de stripfiguren Sunny en Tim laten zien hoe nucleair diagnostisch onderzoek wordt gedaan. In "Sam komt je helpen!" wordt met behulp van een nieuw karakter 'Sam' uitgelegd hoe behandelingen in de nucleaire geneeskunde werken. "Ronald van Rheenen, INVOLVED Doel van INVOLVED is kennis beschikbaar maken voor iedereen op zo'n manier dat het begrijpelijk en toepasbaar is voor mensen van alle leeftijden en intelligentie niveau's. Het initiatief heeft animaties, prentenboeken, informatiekaarten, first-person-video's en impressie foto's voorgebracht om patiënten te informeren over nucleaire en radiologische onderzoeken/therapieën. Hierdoor zijn zij beter geïnformeerd en meer in staat de regie te voeren over de zorg."

Reflects philosophy of Model Curriculum Guide for the English-Language Arts (K-8).

The Goths-a rumored people first known by history around the river Vistula in present Poland-was the people that more than other contributed to the fall of the Roman Empire. It was however also the Goths who preserved the Roman culture against other Germanic tribes. Earlier it has been generally assumed the Goths originated in Scandinavia but during the 20th c. many scholars have grown skeptical. The author has, using both Classical and Nordic sources and supplementary sciences, made probable there is an intimate connection between the Goths and the Nordic countries. Consequently it is quite possible that at least part of the Goths have a Nordic origin. The book rests on the basic hypothesis that the Goths are not a people but a number of tribes and peoples united through a common religious/cultic origin. The old dspute concerning the relationship between Svear and Gautar also gets quite a new meaning. The book is interdisciplinary and embraces history, religion, arts, linguistics and archaeology. In 1999 Ingemar Nordgren received his Ph.D. at Odense University, Denmark The book builds to a considerable extent on his dissertation but has been updated and partly rewritten with brand new material.

In this pioneering work, based upon interviews with many of the surviving protagonists, Cornelis (Cees') Andriesse tells the story of the role that Dutch publishing houses played in the rise of English language commercial science publishing after the Second World War, that was preceded by the decline of science publishing in German. Using the existing literature as well as many privately held archival sources, the author follows the fortunes of the leading publishers, Martinus Nijhoff, Elsevier and North Holland while also briefly discussing smaller houses like Dr. W. Junk and Reidel. The book contains lively portraits of the main characters involved and will no doubt stimulate further research and discussion of the role of publishing in the history of science. The authorsa (TM) main thesis that successful publishing requires a strong, fruitful partnership between an academic publisher and an academic editor, will no doubt convince most readers. This is a great book on the most productive friendships and partnerships in the history of science publishing.

NEW YORK TIMES BESTSELLER Now Elizabeth Hess's unforgettable biography is the inspiration for Project Nim, a riveting new documentary directed by James Marsh and produced by Simon Chinn, the Oscar-winning team known for Man on Wire. Hess, a consultant on the film, says, "Getting a call from James Marsh and Simon Chinn is an author's dream. Project Nim is nothing short of amazing." Could an adorable chimpanzee raised from infancy by a human family bridge the gap between species—and change the way we think about the boundaries between the animal and human worlds? Here is the strange and moving account of an experiment intended to answer just those questions, and the astonishing biography of the chimp who was chosen to see it through. Dubbed Project Nim, the experiment was the brainchild of Herbert S. Terrace, a psychologist at Columbia University. His goal was to teach a chimpanzee American Sign Language in order to refute Noam Chomsky's assertion that language is an exclusively human trait. Nim Chimpsky, the baby chimp at the center of this ambitious, potentially groundbreaking study, was "adopted" by one of Dr. Terrace's graduate students and brought home to live with her and her large family in their elegant brownstone on the Upper West Side of Manhattan. At first Nim's progress in learning ASL and adapting to his new environment exceeded all expectations. His charm, mischievous sense of humor, and keen, sometimes shrewdly manipulative understanding of human nature endeared him to everyone he met, and even led to guest appearances on Sesame Street, where he was meant to model good behavior for toddlers. But no one had thought through the long-term consequences of raising a chimp in the human world, and when funding for the study ran out, Nim's problems began. Over the next two decades, exiled from the people he loved, Nim was rotated in and out of various facilities. It would be a long time before this chimp who had been brought up to identify with his human caretakers had another opportunity to blow out the candles on a cake celebrating his birthday. No matter where he was sent, however, Nim's hard-earned ability to converse with humans would prove to be his salvation, protecting him from the fate of many of his peers. Drawing on interviews with the people who lived with Nim, diapered him, dressed him, taught him, and loved him, Elizabeth Hess weaves an unforgettable tale of an extraordinary and charismatic creature. His story will move and entertain at the same time that it challenges us to ask what it means to be human, and what we owe to the animals who so enrich our lives.

"Working On A Song is one of the best books about lyric writing for the theater I've read."—Lin-Manuel Miranda Anaís Mitchell named to TIME's List of the 100 Most Influential People in the World of 2020 An illuminating book of lyrics and stories from Hadestown—the winner of eight Tony Awards, including Best Musical—from its author, songwriter Anaís Mitchell with a foreword by Steve Earle On Broadway, this fresh take on the Greek myth of Orpheus and Eurydice has become a modern classic. Heralded as "The best new musical of the season," by The Wall Street Journal, and "Sumptuous. Gorgeous. As good as it gets," by The New York Times, the show was a breakout hit, with its poignant social commentary, and spellbinding music and lyrics. In this book, Anaís Mitchell takes readers inside her more than decade's-long process of building the musical from the ground up—detailing her inspiration, breaking down the lyrics, and opening up the process of creation that gave birth to Hadestown. Fans and newcomers alike will love this deeply thoughtful, revealing look at how the songs from "the underground" evolved, and became the songs we sing again and again.

Drawing on meticulous archive research and interviews with Dusty's friends and collaborators, Paul Howes details every song in Dusty's entire catalogue. This revised edition of The Complete Dusty Springfield includes new chapters on the Lana Sisters and the Springfields, expanded entries on Dusty's solo tracks and an in-depth analysis of Dusty's live work for TV and radio.

A complete guide to all high-quality American whiskeys now available, with descriptions and tasting notes, plus a detailed account of the important distilleries and colorful personalities—past and present—who have made American whiskey such a superb and distinctive contribution to our culture.
