Supernatural: of or relating to things that cannot be explained according to natural laws. Less than 50,000 years ago mankind had no art, no religion, no sophisticated symbolism, no innovative thinking. Then, in a dramatic and electrifying change, described by scientists as the greatest riddle in human history, all the skills and qualities that we value most highly in ourselves appeared already fully formed, as though bestowed on us by hidden powers. In Supernatural, Graham Hancock sets out to investigate this mysterious before-and-after moment and to discover the truth about the influences that gave birth to the modern human mind. His quest takes him on a journey of adventure and detection from the stunningly beautiful painted caves of prehistoric France, Spain and Italy to remote rock shelters in the mountains of South Africa where he finds a treasure trove of extraordinary Stone Age art. He uncovers clues that lead him to travel to the depths of the Amazon rainforest to drink the powerful plant hallucinogen Ayahuasca with Indian shamans, whose paintings contain images of supernatural beings identical to the animal-human hybrids depicted in prehistoric caves and rock shelters. And hallucinogens such as mescaline, also produce visionary encounters with exactly the same beings. Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of other dimensions. Could the supernaturals first depicted in the painted caves and rock shelters be the ancient teachers of mankind? Could it be that human evolution is not just the blind, meaningless process that Darwin identified, but something else, more purposive and intelligent, that we have barely even begun to understand?

Publisher ' s Note: A new, expanded edition has replaced this book under the new title Visionary: The Mysterious Origins of Human Consciousness, ISBN 9781637480069 This definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release. Less than fifty thousand years ago mankind had no art, no religion, no sophisticated symbolism, no innovative thinking. Then, in a dramatic and electrifying change, described by scientists as "the greatest riddle in human history," all the skills and qualities that we value most highly in ourselves appeared already fully formed, as though bestowed on us by hidden powers. Could it be that human evolution is not just the "blind," "meaningless" process that Darwin identified, but something more purposive and intelligent, something that we have barely even begun to understand? Previously published as Supernatural, this definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release.

This anthology is aimed at all those who are interested in the connection between consciousness, psychedelics, and the development of humankind. Bestselling author Graham Hancock has been writing and speaking about this to audience ' s worldwide, including a controversial TEDx talk on ayahuasca and DMT, which some call the god molecule. Graham Hancock leads the charge in this collection of the latest thinking on consciousness with a particular focus on the use of psychedelics to open up the realm of the supernatural. Leading minds and radical thinkers including Dennis McKenna, Rick Doblin, Alex Greg, Russell Brand, and Rick Strassman illuminate the topic like never before. Contributors include: Mike Alvernia, Russell Brand, David Jay Brown, Paul Devereux, Rick Doblin, Amanda Fielding, Nassim Hameini, Martina Hoffman, Don Lattin, Eduardo Luna, Dennis McKenna, Thad McKraken, Rak Razam, Gabriel Roberts, Thomas B. Roberts, Robert Schoch, Mark Seelig, Rick Strassman, and Robert Tindall.

Could the story of mankind be far older than we have previously believed? Using tools as varied as archaeo-astronomy, geology, and computer analysis of ancient myths, Graham Hancock presents a compelling case to suggest that it is. " A fancy piece of historical sleuthing . . . intriguing and entertaining and sturdy enough to give a long pause for thought. " —Kirkus Reviews In Fingerprints of the Gods, Hancock embarks on a worldwide quest to put together all the pieces of the vast and fascinating jigsaw of mankind ' s hidden past. In ancient monuments as far apart as Egypt ' s Great Sphinx, the strange Andean ruins of Tiwanaco, and Mexico ' s awe-inspiring Temples of the Sun and Moon, he reveals not only the clear fingerprints of an as-yet-undiscovered civilization of remote antiquity, but also startling evidence of its vast sophistication, technological advancement, and evolved scientific knowledge. A record-breaking number one bestseller in Britain, Fingerprints of the Gods contains the makings of an intellectual revolution, a dramatic and irreversible change in the way that we understand our past—and so our future. And Fingerprints of God tells us something more. As we recover the truth about prehistory, and discover the real meaning of ancient myths and monuments, it becomes apparent that a warning has been handed down to us, a warning of terrible cataclysm that afflicts the Earth in great cycles at irregular intervals of time—a cataclysm that may be about to recur. " Readers will hugely enjoy their quest in these pages of inspired storytelling. " —The Times (UK)

The Master Game is a rollercoaster intellectual journey through the back streets and rat runs of history to uncover the traces in architecture and monuments of a secret religion that has shaped the world. Pivotal historical events and processes, not least the Renaissance, the birth of scientific rationalism, and the French and American revolutions, are radically reevaluated in the light of new investigative evidence presented in The Master Game. Even the belief that the United States has a "global mission," so obvious today, may ultimately prove to be less the result of a shorterterm reaction to terrorism than the inevitable working out of a covert plan originally set in motion almost two thousand years ago. The Master Game refers to a scheme or "game" played on the world stage to bring about a world order governed by a lofty goal which, today, we term the "Masonic ideal." The Master Game traces the origins of this game of symbols and words and talismans from ancient Egypt all the way to modern times, and places it squarely on the elitist Scottish Rite Freemasonry, headquartered in Washington, DC, and ruled by a secretive and powerful brotherhood of men who have attained the thirtythird degree. The Master Game exposes this world order' s true purpose and, more importantly, shows how it has affected the United States of America and badly backfired on 9/11. The book is adapted and expanded from the authors' earlier, outofprint book Talisman.

Thinkers at the forefront in alternative theories on history, the origins of civilization, technology, and consciousness • With contributions by Graham Hancock, Robert Bauval, Mark Booth, Richard Hoagland, Robert Schoch, John Anthony West, and others • Topics range from quantum philosophy and paranormal phenomena to the secret history of NASA, instant polar shifts, and ancient Martian civilizations • Explores where our present time fits into the cycle of human existence A revolution of thought is under way in our world, fostered by decades of research and well-documented evidence by alternative theory pioneers such as Graham Hancock, John Anthony West, Robert Bauval, and Robert Schoch. These provocative, cutting-edge scholars now represent a direct challenge to the academic establishment as the paradigms of science and history shift and their ideas gain acceptance. Representing the latest, often controversial findings in scientific and historical research, this anthology of essays commissioned by Graham Hancock, bestselling author of Fingerprints of the Gods, covers the forefront in alternative theories on history, the origins of civilization, technology, and consciousness with topics ranging from quantum philosophy and paranormal phenomena to the ancient use of electromagnetism, the effect of cosmic rays on human evolution, and NASA ' s cover-up of ancient Martian civilizations. Recognizing that many recent discoveries are actually rediscoveries of lost knowledge from past civilizations, these authors seek to understand where, within the bigger picture of human knowledge, our present time fits into the cycle of human existence.
