Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than

1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment

What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

investigation, discussion, and analysis of the origins and development of the first civil war in the Sudan, which occurred between 1955 and 1972. It was the culmination of ethnic, racial, cultural, religious, political, and economic problems that had faced the Sudan since the Turco-Egyptian conquest of the country in 1821. The hostilities between the Northern and Southern regions of the Sudan also involved foreign powers that had their own geopolitical interests in the country. The first Sudanese civil war is a classic example of intra-regional and inter-regional conflicts in Africa in the 20th century.

various printed versions and its theatrical productions. Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play. The issues discussed include gender, authority, female autonomy and unruliness, courtship and marriage, language and speech, and performance and theatricality.

"What Works in Girls Education" summarizes the extensive body of research on the state of girls education in the developing world today; the impact of educating girls on families, economies, and nations; and the most promising approaches to increasing girls enrollment and educational quality.

characteristics of akshara orthography and how they may affect literacy development and problems along with the implications for assessment and instruction. Even though akshara orthography is used by more than a billion people, there is an urgent need for a systematic attempt to bring the features, research findings, and future directions of akshara together in a coherent volume. We hope that this volume will bridge that gap. Akshara is used in several Indic languages, each calling it by a slightly different name, for example 'aksharamu', in Telugu, 'akshara' in Kannada, and 'akshar' in Hindi. It is the Bhrami-derived orthography used across much of the Indian subcontinent. There is a growing body of research on the psycholinguistic

underpinnings of learning to read akshara, and the emerging perspective is that akshara, even though classified as alphasyllabaries, abugida, and semi-syllabic writing systems, is neither alphabetic nor syllabic. Rather, akshara orthography is unique and deserves to be a separate classification and needs further investigation relating to literacy acquisition in akshara. The chapters in this volume, written by leading authors in the field, will inform the reader of the current research on akshara in a coherent and systematic way.

Neil Cornwell's study, while endeavouring to present an historical survey of absurdist literature and its forbears, does not aspire to being an exhaustive history of absurdism. Rather, it pauses on certain historical moments, artistic movements, literary figures and selected works, before moving on to discuss four key writers: Daniil Kharms, Franz Kafka, Samuel Beckett and Flann O'Brien. The absurd in literature will be of compelling interest to a considerable range of students of comparative, European
