GIS Maps & Data. Historically, Texans have turned to the Texas General Land Office for maps and other tools used to display and organize information about the state's rich natural resources. Besides historical maps, research, and data, today the Land Office uses Geographic Information Systems (GIS), aerial imagery, 3D elevation data, and field data collection to compile, analyze, and distribute the most accurate geospatial data possible about the location of natural and cultural resources.

GIS Maps & Data - Texas General Land Office

Texas Search for Texas survey maps. A survey map search can provide information on property maps, plat maps, GIS maps, property lines, public access land, unclaimed parcels, flood zones, zoning boundaries, property appraisals, property tax records, parcel numbers, lot dimensions, boundary locations, public land, and topography.

Texas Survey Maps

This page maps the Texas Land Survey onto Google Earth. Texas does not use the Public Land Survey System. Texas has its own survey based on original Spanish Land Grants. You must zoom over Texas, USA in order to see the data. The data shows Texas Abstracts. It does not show individual properties or parcels.

Texas Land Survey - Earth Point

Information: Texas Land Survey. An interpretation of the Original Texas Land Surveys boundaries and bay tracts. The dataset was derived from the Texas General Land Office (GLO) county maps, the GLO Abstract of Original Land Titles:Volumes and Supplements, and the GLO maps of State-Owned Submerged Lands of the Texas Gulf Coast (bay tracts). The GLO county maps, showing the boundaries of the original land grants of the State of Texas, were compiled and drawn by GLO draftsmen.

Texas Land Survey Search By Description

Texas Land Survey Maps A map is really a graphic counsel of your whole region or an element of a place, generally displayed with a level work surface. The job of any map would be to show distinct and comprehensive attributes of a certain place, normally utilized to demonstrate geography.

Texas Land Survey Maps | Printable Maps

These historic county maps are cadastral (land ownership) maps, showing original surveys, usually made by virtue of a land grant, within a particular county in Texas. In many ways, these maps represent the foundation of the GLO archival map holdings, as they tie directly into the original land grant documents that are also housed at the GLO. As land was patented by settlers, meaning title was issued from the sovereign government, more surveys were shown on GLO maps.

GLO Historic County Maps - The Portal to Texas History

The type of map you need is called a survey map, and it's likely that at least one has been created showing your property lines. Survey maps show the legal boundaries of properties and other landmarks, and many such maps are free to access online. We've created these instructions to help you find survey maps related to your property.

Limestone County - The Portal to Texas History

Land surveys map out a piece of land and describe all of the buildings and structures on it. To find an existing survey, you'll need to gather specific information about the property, like the street address or boundary description. Then, visit the local city or county's website, which may have information about where the survey is kept.

3 Ways to Find a Land Survey - wikiHow

The Patent (Landowner) map can be viewed in tandem with two other maps: one with ROADS and the other with STREAMS and RAILROADS, both with towns and cemeteries. Our Texas Land Survey Maps present similar information but with maps organized so that all landowners and geographical features in an area can be seen in a single map.
