Let me ask you.... What's the most important thing you are looking for from your book about aromatherapy and essential oils? Clear advice from an expert in their field? An easy to navigate guide? Comprehensive data of many oils and how to use them? Value for money? It seems to me that you may fit into one of three categories: A complete beginner to essential oils who wants to learn how to treat themselves and their family safely. A student or professional aromatherapist looking to grow their, already ample, aromatherapy bookshelf A distributor for an aromatherapy multi level marketing company such as Young Living or Doterra who wants to better understand their product Am I right? This book, written by a professional aromatherapist with 21 years experience has a little something for each of you. Instructions on recommended oils for 60 different ailments Information on 104 essential oils and their safety data (referenced from Tisserand Essential Oil Safety Data for Health Professionals 2013) Facts on how to use 16 different carrier oils including coconut oil, tamanu, and also St Johns Wort Recipe blends by another 13 professional aromatherapists including a blend to use in labour by a midwife using essential oils on an NHS maternity ward and an aphrodisiac blend by a professional sex therapist. Details of how the chemistry of essential oils works Reflections on how plant extracts have been used since early neolithic times right up to the present day Plus extra bonus material: Free hypnotherapy relaxation download 6 essential oil monographs including the most up to date information into clinical trials into many conditions including breast, skin and prostate cancers as well as diabetes: on lavender oil, tea tree oil, geranium, rose, myrrh and chamomile. Past professionally published papers by the author on Agarwood, Damiana, Tuberose, Calendula and myrtle oils Discount vouchers to 15 aromatherapy schools, product stores and treatment clinics. Over 300 pages and 21 years of professional experience.... What have you got to lose? Scroll up and buy!

Fibromyalgia is a severe musculoskeletal pain and fatigue syndrome that afflicts approximately 3 to 6 million Americans. Fibromyalgia: The Complete Guide from Medical Experts and Patients is a compilation of a diverse group of health care practitioners and a comprehensive guide for patients and families. The book provides authoritative, practical advice and answers to common questions about this condition to help patients and families achieve a greater understanding of all aspects of dealing with fibromyalgia. Physicians incorporate newest research on fibromyalgia. This resource offers material never presented in any other fibromyalgia book. the research presented by an experienced psychiatrist on ADHD, concurrent with fibromyalgia and chronic pain, is innovative offering a piece of the puzzle that has been previously ignored and may offer new hope and insight to those with chronic pain. Patients give first hand accounts of how they have effectively improved their functionality and pain levels by incorporating suggestions outlined in the book. This valuable resource breaks down complex medical issues into understandable terms, and focuses on the most important things readers need to know to understand and manage fibromyalgia.

This book describes the theory and application of massage techniques, their physiological effects, indications and contraindications, and how massage is therapeutically applied in the treatment of many common conditions.

The Complete Guide to Nutrition in Primary Care Edited by Darwin Deen, MD, MS Lisa Hark, PhD, RD Clinicians and patients agree that primary care office visits should include routine nutrition assessment and counseling. But how do you fit it into an already crowded consultation? And what is the most up-to-date advice? With The Complete Guide to Nutrition in Primary Care, Drs. Deen and Hark provide the necessary tools. This comprehensive overview of nutrition answers your questions on: Nutrition as Preventive Medicine  Nutrition through the Lifecycle  Improving Health by Changing Diet and Lifestyle Behaviors  Vitamins, Minerals, Dietary Supplements, and the Alternative  Successful Changes to the Environment This timely paperback contains everything the primary care clinician needs to counsel patients on diet and lifestyle issues. Keep it close at hand for the frequent consultation it is sure to receive. Dr. Darwin Deen is one of the nation's foremost authorities on nutrition. Currently Professor of Clinical, Family and Social Medicine and Director of Medical Student Education at the Albert Einstein College of Medicine in New York, he has trained a generation of physicians on the connection between nutrition and health. He has played a leading role in revising medical school curricula to incorporate nutrition training. An award-winning teacher and noted author, he serves as Chair of the Task Force on Medical Nutrition Education of the American College of Nutrition and co-chairs the Group on Nutrition of the Society of Teachers of Family Medicine. His years of experience as a family physician make him perfectly suited to advise clinicians on counseling their patients on diet and lifestyle. Dr. Lisa Hark is a renowned family nutrition expert, with more than 20 years of experience in nutrition counseling and promoting the benefits of healthy eating in children and adults. As Director of the Nutrition Education Program at the University of Pennsylvania School of Medicine in Philadelphia, she developed a model medical school curriculum and textbook, Medical Nutrition and Disease, which has become one of the most widely used texts in nutrition education. She was given the Excellence in Medical/Dental Nutrition Education award from the American Society for Nutrition. Dr. Hark was also the host of the TV show, (Honey, We're Killing the Kids,) which airs on TLC, and is a widely sought after speaker who communicates nutrition concepts effectively to health professionals, patients, and the media. www.blackwellmedicine.com

Like getting 7 books in 1, MOSBY'S ONCOLOGY NURSING ADVISOR provides quick access to essential information on a wide range of cancer topics, including types of cancer, treatment options, symptom management, palliative care, and patient teaching. Its user-friendly layout and straightforward coverage make it ideal for use in any clinical setting, offering authoritative guidance to help you provide the best possible oncology nursing care. Detailed descriptions of over 50 major cancer types provide essential information on incidence, etiology and risk factors, signs and symptoms, diagnostic workup, histology, staging, treatment, prognosis, and prevention. Coverage of cancer management principles outlines a wide range of treatment and pharmacologic modalities, including surgery, chemotherapy, radiation therapy, hormonal therapy, biological response modifiers, and complementary and alternative therapies. Symptom management guidelines provide in-depth coverage of pathophysiology, assessment tools, lab and diagnostic tests, differential diagnoses, interventions, follow up care, and resources for over 30 common symptoms associated with cancer and cancer treatments. Essential information on many oncologic emergencies and emergent issues prepares you to respond quickly to structural, metabolic, and hematologic emergencies. Helpful patient teaching resources include more than 25 reproducible patient teaching handouts. An entire section on palliative care and end-of-life issues offers helpful guidelines for dealing with topics related to hospice care, communication in palliative care, the final hours of the cancer patient, ethical considerations, and loss, grief, and bereavement. Serves as a great study tool for the oncology nursing certification exam..

Also covered: The medical system Effective communication strategies Best care practices HIPPA compliance Americans with Disabilities Act Pain tolerance and sensory issues Body awareness

Published in 1987, Clinical Art Therapy is a valuable contribution to the field of Psychotherapy.

A Practical Guide to Managing Clinical Trials is a basic, comprehensive guide to conducting clinical trials. Designed for individuals working in research site operations, this user-friendly reference guides the reader through each step of the clinical trial process from site selection, to site set-up, subject recruitment, study visits, and to study close-out. Topics include staff roles/responsibilities/training, budget and contract review and management, subject study visits, data and document management, event reporting, research ethics, audits and inspections, consent processes, IRB, FDA regulations, and good clinical practices. Each chapter concludes with a review of key points and knowledge application. Unique to this book is "A View from India," a chapter-by-chapter comparison of clinical trial practices in India versus the U.S. Throughout the book and in Chapter 10, readers will glimpse some of the challenges and opportunities in the emerging and growing market of Indian clinical trials.

Med School Confidential from Robert H. Miller and Daniel M. Bissell uses the same chronological format and mentor-based system that have made Law School Confidential and Business School Confidential such treasured and popular guides. It takes the reader step-by-step through the entire med school process--from thinking about, applying to, and choosing a medical school and program, through the four-year curriculum, internships, residencies, and fellowships, to choosing a specialty and finding the perfect job. With a foreword by Chair of the Admissions Committee at Dartmouth Medical School Harold M. Friedman, M.D., Med School Confidential provides what no other book currently does: a comprehensive, chronological account of the full medical school experience.
