For example, consciousness empowers you to run a business where generating a profit is NOT the highest priority, even though the market economy is geared to reward you for putting profit first.**

### The Consciousness Revolution—Ascension Symptoms

"The Consciousness Revolution is an extraordinary discussion among three of the very finest minds of our time, spirited in its exchange, compassionate in its embrace, brilliant in its clarion call to awaken our conscience and consciousness." Ken Wilber, author of Sex, Ecology, Spirituality and One Taste

### The Consciousness Revolution by Peter Russell

The reason consciousness is such a powerful factor is that it empowers people to circumvent systems that get in the way of serving the greater good. For example, consciousness empowers you to run a business where generating a profit is NOT the highest priority, even though the market economy is geared to reward you for putting profit first.

### The Consciousness Revolution—Steve Pavlina

Higher consciousness is the consciousness of a god or "the part of the human mind that is capable of transcending animal instincts". While the concept has ancient roots, dating back to the Bhagavad Gita and Indian Vedas, it was significantly developed in German idealism, and is a central notion in contemporary popular spirituality, including the New Age movement.

### The Consciousness Revolution—Graham Hancock Official Website

This revolution is to the 21st century what the Scientific Revolution was to the 20th. The Scientific Revolution revealed objective, discernible laws of external phenomena and applied those laws to the material world. The Consciousness Revolution reveals objective, discernible laws of internal phenomena and applies them to the world as well.

Discusses current global conditions including peace, changes in society, education, religion, spirituality, and consciousness

The revolution of the Consciousness is taking place Now, in the present moment. There are no strategies, no great leaders in this revolution, only heroes who understand the evolutionary progress of the Consciousness and are open to allow the processes to take place in themselves

The things that are happening on planet Earth these days are more than unbearable. Everyone is aware of it, but no one knows what to do about it. This change needs to be individual. It is up to each of us, and it is our responsibility to make this world a better place. Because it is far from being OK, and there is no evidence more convincing than today's human. But he is free to choose whether he will continue his development on the conscious level or not. Life is a game, but it is hard to play with people who don't know the rules. Just as each machine has its own instructions for use, it is the same with life and people. And they are actually very simple instructions. When each of us starts working individually, it will join us all together. This book was not written to be liked - it should be, above all, understood. God, Sex, Money, Ego, Morality, (mass)Media, Love, Meditation, Esotericism, Consciousness, Education, etc. - the real holistic view.

In his last work as an author, celebrated doctor and psychotherapist Claudio Naranjo uses The Revolution We Expected to make a final call to humanity to awaken to our collective potential and work to transcend our patriarchal past and present. The book presents a map that argues not only for collective individual awakening but a concerted effort to transform our institutions so that our educational and cultural lessons are in service to a better world. The author targets traditional education and our global economic system that increasingly neglect human development and must transform to meet the needs of future social evolution. He stresses the need for education to teach wisdom over knowledge and he suggests meditation and contemplative practices can help us realize new ways to learn. Ultimately, we need to embark on a collective process of re-humanizing our systems and establishing self-awareness as individuals to create the necessary global consciousness to realize a new way forward.

Discusses the background of the consciousness revolution, the many philosophies connected with it, including TM, est, and hari krishna, and its effect on the American way of life.

The focus of this book is a calling to come home to our hearts. To come back to the innocence and return to the love that is forever present.

There is a tyranny against human consciousness in existence upon this planet that is taking humanity towards an unwanted future. There is ongoing an operation of enslavement. This enslavement has been upon a perceptual level for centuries. It has operated upon the physical human body as well as through social, cultural, political, religious, and economic institutions. It has operated through mental and emotional systems as well as energetic and vibrational. The human individual lives within a perception prison that is guarded, supervised, and sustained by an elusive and insidious Operation that exists upon many layers, within multiple networks, and through various mediums.It is time to break out from this incarceration.The passages of information that proceed within this book have been formulated in a distinct way to assist in breaking this spell upon the individual. The reader has nothing to do for now except to read on. Once you have finished the book, you will then be in a position to make the next decision for yourselves. Yet at the very least you will have been given a tool - your self - to unlock in which to make the next step. This book is also a tool. It is a tool that can unlock a window of perception. The Tyranny Against Human Consciousness is a manifesto for human awakening from the perceptual prison that is the programming of modern life.

An exploration of the current revolution in scientific thought and the newest scientific findings in support of the Akashic field **Explains how the new Akasha paradigm recognizes the interconnection of all things in space and time through the quantum resonance of the Akashic field** **Reveals the cosmos to be a self-actualizing, self-organizing whole, bringing forth life and consciousness in countless universes** **Explores the latest discoveries in the sciences of life, mind, and cosmos** Science evolves through alternating phases of (normal science) and radical shifts that create scientific revolutions. We saw this at the turn of the 20th century, when science shifted from a Newtonian worldview to Einstein's relativity paradigm, and again with the shift to the quantum paradigm. Now, as we recognize the nonlocal interconnection of all things in space and time, we find our scientific worldview shifting once again. With contributions by physicists Paul A. LaViolette and Peter Jakubowski, pioneering systems scientist Ervin Laszlo explores the genesis of the current revolution in scientific thought and the latest findings in support of the Akashic field. He explains how the burgeoning Akasha paradigm returns our way of thinking to an integral consciousness, a nonlinear mode of understanding that enables us to accept the reality of nonlocal interconnection throughout the world. This new inclusive way of understanding reaffirms the age-old instinctive comprehension of deep connections among people, societies, and nature, and it integrates and transcends classical religious and scientific paradigms. Providing examples from cutting-edge science of quantum-resonance-based interactions among all living systems, Laszlo shows the cosmos of the Akasha to be a self-actualizing, self-organizing whole, where each part is in coherence with all others and all parts together create the conditions for the emergence of life and consciousness. The advent of the Akasha paradigm marks a new stage in science's understanding of the fundamental nature of the world and offers unique guidance for contemporary efforts to create a peaceful and sustainable world.
