Renaissance writer Christopher Marlowe and 20th century American playwright Bernard Shaw are no exceptions to this: in their renowned texts Doctor Faustus and Pygmalion are fascinated with the question of what it means to be a human being.

Even in the degradation and misery of Dachau concentration camp, Viktor Frankl retained the belief that the most important freedom of all is the freedom to determine one's own spiritual well-being. He wrote the international bestseller Man's Search for Meaning as a result of that experience, while in The Doctor and the Soul, Dr Frankl revolutionised psychotherapy with his theory of Logotherapy. Viktor Frankl's work has been described as “the most important contributions in the field of psychotherapy since the days of Freud, Adler and Jung.”

A moving memoir and an extraordinary love story that shows how an expert physician became a family caregiver and learned why care is so central to all our lives and yet is at risk in today's world. When Dr. Arthur Kleinman, an eminent Harvard psychiatrist and social anthropologist, began caring for his wife, Joan, after she was diagnosed with early-onset Alzheimer's disease, he found just how far the act of caregiving extended beyond the boundaries of medicine. In The Soul of Care: The Moral Education of a Husband and a Doctor, Kleinman delivers a deeply humane and inspiring story of his life in medicine and his marriage to Joan, and he describes the practical, emotional and moral aspects of caretaking. He also writes about the problems our society faces as medical technology advances and the cost of health care soars but caring for patients no longer seems important. Caregiving is long, hard, unglamorous work--at moments joyous, more often tedious, sometimes agonizing, but it is always rich in meaning. In the face of our current political indifference and the challenge to the health care system, he emphasizes how we must ask uncomfortable questions of ourselves, and of our doctors. To give care, to be “present” for someone who needs us, and to feel and show kindness are deep emotional and moral experiences, enactments of our core values. The practice of caregiving teaches us what is most important in life, and reveals the very heart of what it is to be human.

By the time most of us meet our doctors, they’ve been in practice for a number of years. Often they seem aloof, uncaring, and hurried. Of course, they’re not all like that, and most didn’t start out that way. Here are voices of third-year students just as they begin to take on clinical responsibilities. Their words focus on the odd transition students face when they must deal with real people in real time and in real crises and when they must learn to put aside their emotions to make quick, accurate, and sensitive decisions. Their decisions aren’t always right, and the consequences can be life-altering—for all involved. Moving, disturbing, and candid, their true stories show us a side of the profession that few ever see, or could even imagine. They show, often painfully, how medical students grow up, right at the bedside.

A Harvard-educated neurosurgeon reveals his experiences—in and out of the operating room—with apparitions, angels, exorcism, after-death survival, and the miracle of hope. For the millions who have enjoyed Proof of Heaven, Heaven is Real, To Heaven and Back, and Getting to Heaven—an inspiring tale from where the veil between life and death is often at its thinnest. The Scalpel and the Soul explores how premonition, superstition, hope, and faith not only become factors in how patients feel but can change outcomes. It validates the spiritual manifestations physicians see every day and empowers patients to voice their spiritual needs when they seek medical help. Finally, it addresses the mysterious, attractive powers the soul exerts during life-threatening events.

Experiencing and refusing to let go of negative emotions, whether caused by us or inflicted by others, can weigh heavy on our shoulders. Oftentimes, this dis-ease of the human spirit leads to injury and disease of the human body. In this unique collection of medical narratives, Peter J. Rappa, MD, reaches beyond antibiotics and physical therapy to explore the close connection between the soul and the body. By watching and learning from his rehabilitation patients, Dr. Rappa discovered the power gained from cleansing the heart in order to heal the body and embark on a new chapter in the heroic journey that is life.

Cancer moves more slowly today, thanks to modern science. But science provides scant solace when it fails, slowly, to save our physical forms...and religious faith too often proves fragile during a long mortal watch. For decades, Dr Stephen Iacoboni carried John Donne's words with him in his coat pocket: No man is an island. Every man's death diminishes me. Therefore, do not send to know For whom the bell tolls. It tolls for thee. Donne's sentiment lived in his heart and, over time, began to break it, when the best medicine was not enough. Every patient's death begged questions. I knew there was something missing for them, and for me that until I could offer answers I would never be the healer I hoped to become. The physician did not heal himself. His patients did, at last, after extracting promises that he would bring their revelations to light. It is their stories that guide this voyage of thought and spirit, laughter and love. This book is a primer for people facing life's last and greatest mystery, and for those who travel with them an inspirational alternative to loneliness and fear...and an introduction to what is, simply, The Undying Soul.
