The Vietnam War is one of the most misunderstood military  
conflicts in twentieth-century America. Showcasing seventy-two  
true stories told by American servicemen who fought from the  
skies, this unique and historically significant collection is a stunning  
record of the air war in Southeast Asia during the 1960s and 1970s.  
There is no political agenda. There is no partisan opinion. There is  
no romanticizing. These are simply tales from the thick of an  
endlessly complex conflict, raw and uncut, told directly by the men  
who were foisted into its napalm- and sweat-soaked clutches.  
Occasionally funny, sometimes tragic, and often harrowing, these  
true accounts bring new and personal perspectives to one of the  
most studied and most maligned wars in America's history,  
revealing with no Hollywood glamorizing what the war was really  
like for members of the US Air Force of all ranks and myriad  
functions who answered the call to fight. They saw no choice but to

follow the orders they were given. And for better or for worse, by the time they returned, each of them would be changed forever.

A new foreword by Stephen Coonts has been added to this paperback edition of a book first published in 1987."--BOOK JACKET.

From the briefing rooms and bombing runs to the dogfights and last ditch bail outs, here are the true stories of the fighting men of Vietnam as told by aviation expert Frank Harvey. This is what it was like to fight in the flame-filled skies of Southeast Asia.

Palace Cobra picks up where Ed Rasimus's critically acclaimed *When Thunder Rolled* left off. Now he's flying the F-4 Phantom and the attitude is still there. In the waning days of the Vietnam War, Rasimus and his fellow pilots were determined that they were not going to be the last to die in a conflict their country had abandoned. They were young fighter pilots fresh from training and experienced aviators who came back to the war again and again, not for patriotism, but for the adrenaline rush of combat. From the bathhouses and barrooms to the prison camps of North Vietnam, this is a gripping combat memoir by a veteran fighter pilot who experienced it all. The wry cynicism of a combat aviator will give readers insights into the Vietnam experience that haven't been available before, and the heart-stopping action will keep readers turning the pages all night.

As Dennis M. (Mike) Ridnouer writes in the foreword of his new oral history, *The Vietnam Air War: First Person*, over five million missions were flown in the Vietnam War. The many pilots, crew, and support personnel who risked their lives daily don't deserve to fade into obscurity. Unhappy with the lack of first-person retellings of the war, Ridnouer made it his new mission to preserve these men's tales of bravery and duty. The result is more than one

# Read Book The Vietnam Air War From The Pit

hundred stories from the front lines of the war. Air Force Fighter Pilots, Weapon Systems Operators (WSOs), and Electronic Warfare Officers (EWOs), recount their stories of air-to-air engagements, near misses, successes, and failures. A pilot explains why he buys a drink for every tanker driver he meets. An airman explains what a Thud is. A veteran vividly describes his homecoming. These stories and others provide a much different account of the war than those found in history books. The pages come alive with perilous missions and skilled maneuvers. Airmen from all walks of life were united during the war, and their tales include stirring accounts of friendship and comradery.

"The Right Stuff without the hype, Yeager without the ego."—Washington Post Book World "While the jet-jockey competitiveness, the undercurrent of fear, the victories and foul-ups of jet sweeps have been described many times, few such chronicles have done it so grippingly and with such a ring of accuracy. Mr. Grant explores the emotions felt not only by the men in battle but by the wives and others left behind, and the questions the war raised in their minds. To put in larger context the war's impact on individual participants, the author periodically reviews the high-level struggles over how to fight the air war. "What is most impressive is to find an analysis so clearly stated, so seemingly on track in locating the weak spots in the policies of various political and military officials....Written in a straightforward yet stylish prose, *Over the Beach* carries tremendous conviction."—Richard Witkin, New York Times Book Review

A reexamination of the effectiveness of air power during the Vietnam War, from the tactical aspects of war to the level of national policy.

Filling a substantial void in our understanding of the history of airpower in Vietnam, this book provides the first comprehensive

# Read Book The Vietnam Air War From The Pit

treatment of the air wars in Vietnam. Most important for understanding the US defeat, Laslie illustrates the perils of a nation building a one-dimensional fighting force capable of supporting only one type of war.

Gives the technical specifications for helicopters, fighters, and other aircraft, and tells how they were used in Vietnam

Operation Rolling Thunder was the campaign that was meant to keep South Vietnam secure, and dissuade the North from arming and supplying the Viet Cong. It pitted the world's strongest air forces against the MiGs and missiles of a small Soviet client state. But the US airmen who flew Rolling Thunder missions were crippled by a badly thought-out strategy, rampant political interference in operational matters, and aircraft optimised for Cold War nuclear strikes rather than conventional warfare. Ironically, Rolling Thunder was one of the most influential episodes of the Cold War – its failure spurring the 1970s US renaissance in professionalism, fighter design, and combat pilot training. Dr Richard P. Hallion, one of America's most eminent air power experts, explains how Rolling Thunder was conceived and fought, and why it became shorthand for how not to fight an air campaign.
