The goal of this thesis was to develop a secure and user friendly authentication scheme for public wireless networks (PWLANS). In contrast to private wireless networks, public wireless networks need a

Where To Download

proper authentication scheme for several reasons. First of all, the network operator must be able to identify a user in case an incident happens. Furthermore, such networks are usually controlled by a commercial operator who will hardly allow access for free. This leads to the need for

Where To Download

a secure and reliable authentication method. However, the authentication method must be userfriendly too in order to be acceptable. The only "wireless networks" users know so far are cellular networks, which are very easy to use. Users do therefore ask for a

This thesis evaluates
the Trusted Platform
Module (TPM) as an
authentication device.
The TPM is a small

device in EAP-TLS.

Furthermore, this
thesis shows

theoretical and real
world evaluations of
EAP-TLS with the
TPM. It will be shown
that this
authentication
method provides a
good level of security
as well as good
usability.
