Economic development in the Third World by Michael P. Todaro, 1989, Longman edition, in English - 4th ed.

Economic Development is the leading textbook in this field, providing a complete and balanced introduction to the requisite theory, the driving policy issues, and the latest research. Todaro and Smith take a policy-oriented approach, presenting economic theory in the context of critical policy debates and country-specific case studies so students see how theory relates to the problems and prospects of developing countries

Economic Development , 10/e is the leading textbook in this field, providing a complete and balanced introduction to the requisite theory, the driving policy issues, and the latest research. Principles and Concepts: Economics, Institutions, and Development: A Global Perspective: Comparative Economic Development: Classic Theories of Economic Growth and Development: Contemporary Models of Development and Underdevelopment. Problems and Policies: Domestic: Poverty, Inequality, and Development; Population Growth and Economic Development: Causes, Consequences, Controversies; Urbanization and Rural-Urban Migration: Theory and Policy; Human Capital: Education and Health in Economic Development; Agricultural Transformation and Rural Development; The Environment and Development; Development Policymaking and the Roles of Market, State, and Civil Society. Problems and Policies: International and Macro: International Trade Theory and Development Strategy; Balance of Payments, Developing-Country Debt, and Issues in Macroeconomic Stabilization; Foreign Finance, Investment, and Aid: Controversies and Opportunities; Finance and Fiscal Policy for Development; Some Critical Issues for the Twenty-First Century. For all readers interested in economic development.

The book is orientated towards the teaching of economics within the context of the major problems of development and underdevelopment in Third World nations and fills a major void in the teaching materials available for this purpose. It has been written for use by first-year economic students at universities throughout Africa, Asia, Latin America and the Middle East.

Over 800 million people suffer from chronic hunger, and over ten million children die each year from preventable causes. These may seem like overwhelming statistics, but as Stephen Smith shows in this call to arms, global poverty is something that we can and should solve within our lifetimes. Ending Global Poverty explores the various traps that keep people mired in poverty, traps like poor nutrition, illiteracy, lack of access to health care, and others and presents eight keys to escaping these traps. Smith gives readers the tools they need to help people overcome poverty and to determine what approaches are most effective in fighting it. For example, celebrities in commercials who encourage viewers to "adopt" a poor child really seem to care, but will sending money to these organizations do the most good? Smith explains how to make an informed decision. Grass-roots programs and organizations are helping people gain the capabilities they need to escape from poverty and this book highlights many of the most promising of these strategies in some of the poorest countries in the world, explaining what they do and what makes them effective.

This collection of Todaro's essays focuses on a wide range of topics in economic development, including rural-urban migration, international legal and illegal migration, population growth, technological change, education, the environment and ethics.

This book examines general Nongovernmental organizations (NGOs) roles and comparative advantages in the broad fight to end global poverty, as well as roles and opportunities specific to particular Millennium Development Goals sectors.

By the winner of the 1988 Nobel Prize in Economics, an essential and paradigm-altering framework for understanding economic development—for both rich and poor—in the twenty-first century. Freedom, Sen argues, is both the end and most efficient means of sustaining economic life and the key to securing the general welfare of the world's entire population. Releasing the idea of individual freedom from association with any particular historical, intellectual, political, or religious tradition, Sen clearly demonstrates its current applicability and possibilities. In the new global economy, where, despite unprecedented increases in overall opulence, the contemporary world denies elementary freedoms to vast numbers—perhaps even the majority of people—he concludes, it is still possible to practically and optimistically retain a sense of social accountability. Development as Freedom is essential reading.

This book outlines and analyzes the economic development of China between 1949 and 2007. Rather than being narrowly economic, the book addresses many of the broader aspects of development, including literacy, morality, demographics and the environment. The distinctive features of this book are its sweep and that it does not shy away from controversial issues. For example, there is no question that aspects of Maoism were disastrous but Bramall argues that there was another side to the whole programme. More recently, the current system of government has presided over three decades of very rapid economic growth. However, the author shows that this growth has come at a price. Bramall makes it clear that unless radical change takes place, Chinese growth will not be sustainable. This large, comprehensive text is relevant to all those studying the economic history of China as well as its contemporary economy. It is also useful more generally for students and researchers in the fields of international and development economics.

This classic, bestselling textbook provides a comprehensive introduction to the field of development economics. The 10th edition of Tony Thirlwall's book, now co-written with Penélope Pacheco-López, provides a clear, comprehensive and rigorous introduction to the theory of development economics and the experience of developing countries. Balancing a historic approach with current data and references, it provides a wide-ranging analysis of the subject. This all-inclusive methodology succeeds at representing different schools of thought with a balance of micro and macro topics. An ideal textbook for undergraduate students of economics and other social sciences, it is also suitable for upper undergraduate and master's level modules on development economics as an option on a non-economics degree. New to this Edition: - A brand new chapter on human capital:education, nutrition, health, and therole of women in development - New material on the Sustainable Development Goals, the measurementof poverty, and the multidimensional poverty index - Discussion of randomized control trials - The role of structural change in economic development - New IMF lending facilities
