For the class, there is plenty of power, and the spread of power is quite large. The 620 i.e. pulls cleanly and strongly from a stop, and has decent peak horsepower despite the broad, smooth spread of torque and horsepower across the rev range. Frankly, the bike pulls much harder than expected for an air-cooled, two-valve per cylinder 620 twin.

The beautiful design of the Alpine Renault 'berlinettes' and their extraordinary performances in competition made them the cars to beat in the late 1960s and early 1970s. This book brings to life the efforts, successes and failures of the engineers and drivers that worked with the cars, and explores the berlinettes' development and history in fascinating detail.

A biography of motor racing mechanic Tony Robinson, who worked with some of the great names of the sport in the 1950s and '60s.

Years of meticulous research have resulted in this unique history, technical appraisal (including tuning and motorsports) and data book of the Ford V8 Cleveland 335 engines produced in the USA, Canada and Australia, including input from the engineers involved in the design, development and subsequent manufacture of this highly prized engine from its inception in 1968 until production ceased in 1982.

This is a story of excitement, laughs, astonishment and anger - a story of the determination of a man with a dream and a passion for motor racing in the big leagues. It is the first time that the history of the always under-financed Gordini racing team has been documented in English, and the first complete story of Gordini himself in any language. This volume will appeal to new enthusiasts and old hands of Formula 1 and sports prototype racing, especially those who have owned a Gordini-badged high-performance Renault road car. It charts Gordini's early life and beginnings in motorsport, up to 1969 when Renault took over the Gordini company, keeping his name on all the racing engines until 1986, before finally resurrecting it for a performance version of the Renault Twingo and Clio in 2009. The book is packed with evocative period images from important collections, supplementary transcripts in English from many contemporary interviews, plus recollections from former employees remembering their time working with Gordini, and an exhaustive set of statistics. All the way it's a roller coaster of joy, despair, humour, and stunning images. The racing legend of 'Le Sorcier' lives on.

We took a low-mileage, ex-military, unregistered Series III Land Rover, stripped it down to its bare bones, and then blended it with an original Series III Station Wagon in very poor condition. After stirring into the pot a selection of new and modified parts from a number of different sources, we ended up with the most immaculate and user-friendly Series III you could imagine. Here's how you can restore or modify your own Series III, from suspension, brakes, and steering, to engine, transmission and body improvements. You want better seats? Galvanized chassis and bulkhead? Immaculately restored body and mechanical components? This manual has the answers. Featuring advice on rebuilding the rear body tub, the bulkhead, Station Wagon side frames, and much more besides, this book is a must!

MV Agusta's classic four-cylinder dominated Grand Prix racing for a decade from 1956. This magnificent engine was always at the heart of the MV Agusta, and it was this engine that created the legend.

Runways and Racers concentrates on the short transitional period, 1952-1954, for sports car racing in America following the ban on public road racing in many of the States. The ban left the rapidly expanding Sports Car Club of America with a problem: where to hold races. At precisely the same time, Curtis LeMay, head of Strategic Air Command, was having problems obtaining funds from Congress to improve conditions on the many air bases located around the country. The solution was a marriage of convenience, whereby the SCCA was allowed access to active SAC air bases to hold its race programmes. In return, the SAC base would receive the net profits from the event, which would be put into the Airmen's Living Improvement Fund. As a result of some initial financial success for the SAC bases, the scheme was also adopted by non-SAC bases together with regional clubs, with the same agreement in place. Complaints from airmen alerted Congressman Errett Scrivner to potential irregularities, and he ordered an audit to be conducted to ascertain precisely what it was costing the air bases to host the races. His findings led to the cessation of the races, ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.
