the qualities of previous editions, while continuing to provide a current, reliable and authoritative educational resource for finance students. This edition introduces a co-author, Peter Phillips (University of Southern Queensland), a reputable educator and academic of finance and economics who contributes a fresh perspective and vitality to Financial Institutions, Instruments & Markets.

The primary contribution of this book is to integrate the important disciplines which simultaneously impact the investment appraisal process. The book presents a study that develops a new approach to investment appraisal which uses a multiple objective linear programming (MOLP) model to integrate the selected disciplines which include capital markets, corporate governance and capital budgeting. The research covers two case studies, one in the e-commerce sector and another in the airline industry in which the above disciplines are integrated. Readers from the areas of corporate governance, regulation, and accounting would find the survey of different approaches and the new integrated optimization approach particularly useful.

Now in its ninth edition, Financial Institutions, Instruments and Markets continues to be one of the market leaders in financial institutions management. With a well-respected author team at the helm, it is a comprehensive resource for all students wanting to learn about the modern financial system, as well as those preparing for a career in finance. This new edition encourages students to understand, anticipate, and challenge the complex and global nature of finance, while maintaining an accessible approach and style.

A History of Psychology: The Emergence of Science and Applications, Sixth Edition, traces the history of psychology from antiquity through the early 21st century, giving students a thorough look into psychology's origins and key developments in basic and applied psychology. This new edition includes extensive coverage of the proliferation of applied fields since the mid-twentieth century and stronger emphases on the biological basis of psychology, new statistical techniques and qualitative methodologies, and emerging therapies. Other areas of emphasis include the globalization of psychology, the growth of interest in health psychology, the resurgence of interest in motivation, and the importance of ecopsychology and environmental psychology. Substantially revised and updated throughout, this book retains and improves its strengths from prior editions, including its strong scholarly foundation and scholarship from groups too often omitted from psychological history, including women, people of color, and scholars from outside the United States. This book also aims to engage and inspire students to recognize the power of history in their own lives and studies, to connect history to the present and the future, and to think critically and historically. For additional resources, consult the Companion Website at www.routledge.com/cw/woody where instructors will find lecture slides and outlines; testbanks; and how-to sources for teaching History and Systems of Psychology courses; and students will find

Money and Capital Markets, 10th edition by Peter Rose and Milton Marquis provides a thorough and comprehensive view of the whole financial system. All the major types of financial institutions and financial instruments present today are discussed, along with how and why the system of money and capital markets is changing. Money and Capital Markets also provides a descriptive explanation of how interest rates and security values are determined. It discusses the current and future trends of the globalization of financial markets, the ongoing consolidation of the financial institutions' sector.
