Intelligent agents, and offers a comprehensive description of the research advances and key achievements related to existing and emerging market designs to reliably and efficiently manage the potential challenges of variable generation (VG). Most EMs are unique in their complex relationships between economics and the physics of energy, but were created without the notion that large penetrations of variable generation (VG) would be part of the supply mix. An advanced multi-agent approach simulates the behavior of power markets over time, particularly markets with large-scale penetrations of renewable resources. It is intended as a reference book for researchers, academics and industry practitioners, but given the scope of the chapters and the highly accessible style, the

There are 15 million women drivers in the UK, yet so often they can feel at a disadvantage when it comes to dealing with the male-dominated motor industry. The solution has generally been seen as to call upon a male partner or family member for help. However, many women don't have a car-savvy bloke easily to hand - and would prefer to be more independent anyway. This is where *The Girls' Car Handbook* comes in. A vital reference book, it is packed with useful information designed to give women greater confidence when tackling every aspect of motoring from getting a good deal when buying a car,

personal safety when driving, handling accidents and breakdowns, tips for greener motoring and much, much more.

Delving deep into the emerging international and federal statutory and legislative developments surrounding Autonomous Vehicle (AV) technologies, Atilla Kasap assesses whether current motor vehicle regulations, liability law and the liability insurance system are fit for purpose today and in the future.

Based on tests conducted by Consumers Union, this guide rates new cars based on performance, handling, comfort, convenience, reliability, and fuel economy, and includes advice on options and safety statistics.
