I'm considering Cripplebush's rubber rocks for my mountain range. I need to decide soon whether to use plaster castings or not. If they look as realistic in real life as they do in pics I'm impressed with the product. My main concern is that the laytex rubber will hold up to household heating, cooking moisture, etc. over many years without ...

While these particular Mountains in Minutes™ FoamRock forms look a bit out-of-scale, the resulting colorations from the acrylic washes looked exceedingly good and pretty much sold me on the idea of using latex foam-rubber rocks for the entire layout. The Cripplebush rocks above appear to be finer-scaled, and seem to be the best-looking foam-rubber rocks available.

Cripplebush isn't the largest employer in the county. Model railroading is a small hobby and the people who need rocks this week is small and there are multiple choices so they don't have a lock on the market. It's probably one guy and maybe his wife, so when they go on vacation, there isn't anyone to answer the phone.

Robert Schleicher wrote the book on slot car racing—literally. In the three short years since Schleicher 's Slot Car Racing: Tips, Tricks & Track Plans was published, the hobby has been virtually transformed by new products and technologies. This new volume, a perfect complement to its predecessor, brings readers and racers up to date, offering a concise, comprehensive overview of slot car racing 's developments, along with expert, practical guidance for putting this information to good use. A primer on the latest digital and analog developments for both 1/32 and HO scales, Schleicher 's book delivers the lowdown on building cars from individual components on ready-to-race chassis, as well as popular tune-up tips to get even more speed and better handling out of today 's cars. Schleicher also provides track tests of 70 cars and a slot-car shootout featuring 23 more vehicles. Finally, Schleicher includes nearly 50 track plans: 14 tabletop-size plans for Scalextric, Classic, Carrera, Sport, SCX, and Ninco brand track; 14 plans modeled on real circuits like Watkins Glen, Monaco, Spa-Francorchamps, Sears Point, and the Bahrain and Shanghai F1 courses; and 17 4x8-foot HO scale plans. Illustrated throughout with color photography and track plan line art, this is the book that no serious slot car racer can afford to be without.

In his first book of non-fiction, originally published in 1962, Herbert Gold explores some not-so-happy problems confronting people in an age of "mass destruction, mass inertia, mass everything." While acknowledging that we live in a time of utmost global significance-war on an enormous scale was a reality of the twentieth century and continues to threaten, unadulterated evil has exhibited itself in grandiose proportions-Gold tackles issues and problems which are very much of significance to the individual: teaching, writing, love, marriage, divorce, and death. In *The Age of Happy Problems*, Gold takes the reader through a journey of eclectic characters, situations, and locales. Part I is a selection of essays entitled "American Events." In "The Age of Happy Problems" we are presented with an analysis of the problems facing people in the middle of their lives and careers. "How to Be an Artist's Wife" explores the prospect of being married, and remaining married, to a temperamental and egotistical artist. "Divorce as a Moral Act" describes the termination of marriage as a means for renewal and the chance to start over again the search for love. "The Bachelor's Dilemma" evokes the decisions confronting the male of the "big city." And "A Dog in Brooklyn, A Girl in Detroit: A Life Among the Humanities" is a memoir on the paradoxes of teaching in a university. Part II is entitled "American Places." The author examines in this section various American lifestyles. In "Paris: Notes from La Vie de Boheme," Gold describes Americans abroad, why they decide to become expatriates, and how they adapt to their new surroundings. In "Greenwich Village: The Changing Village" he writes about the importance of New York City's symbol of change, experiment and nonconformity. Finally, the author meditates on "Death in Miami Beach," offering a moving account of the relationship between death and the popular Florida city. Gold writes: "How can I total it up? What is the map of the map? Well, to begin with, Plato was wrong. The life of contemplation is not sufficient...and for another thing, Plato was right. He knew that men must learn to come together in the practice of intelligence and moral privilege." Gold's essays, stemming from the author's own humanity, are just as poignant and relevant today as they were when they were first published. *The Age of Happy Problems* is sure to captivate, but perhaps most of all, make the reader contemplate the importance of these issues for his or her own life.

The growth of railways was a major influence in transforming Britain's landscape. This book examines how they brought about physical changes to towns, the country and coast, and had a profound affect that is still visible today, especially on the shape and size of our towns and cities. In his book, Gordon Biddle begins by examining how railway routes transformed the rural scene and their effect on the economy, followed by an appraisal of their accompanying buildings such as stations, houses, signal boxes and yards following the changes in nineteenth-century architectural taste. He goes on to look at the impact of railways built along or near the coast, and their strong influence on the growth of seaside resorts and ports. He then turns to townscape, describing in turn the physical effect on London,

other large cities, smaller towns and suburban growth. Also included are chapters on places the railways themselves created, from new towns to villages around a station or junction; the still-visible remains of abandoned railway, not only those that followed mass closures of the 1960s, but many long-standing that date back to the nineteenth century; twentieth- and twenty-first century developments that have continued to impact on the rural and urban scene; and a comparison of contemporary illustrations of an early main line in 1838 with its appearance today.
