Yamaha's SR250 appears as a conglomerate of bits and pieces culled from other bikes in the range and sold, with a semi-chopper image, under the 'custom' label. The engine came from the XT, and the smallish, single-side drum front brake and some other components, such as the snail-type rear-chain adjusters, showed similar trail antecedents.

With styling taken from the Yam SR500 and SR400, the SR 250 was aimed at the popular quarter litre motorbike market (in the UK we used to be able to ride a motorcycle up to 250cc on a car license without the need to take any further motorbike tests). The SR250 was available in other countries and was called the SR250 Exciter in the USA.
